

Paytm App – User Reviews

#	Review
1	I love the app! The app is so much faster to download. You'd stop an entry and it'd be several seconds before it'd actually stop and those extra seconds are added too the entry. Not to mention being unable to use the app when it's syncing because it literally stops responding until it's done.
2	I'm a permanent Paytm user. It is one of the best payment gateways that allows you to pay your bills, recharge your phones, and make other payments through it securely. I've been using it for more than 5 years and I have never faced any issues. The payment gets processed within a few seconds.
3	Was working fine for a long time but since the last two months there has been an error showing 61007 and there is no solution even after trying to call customer care who don't pick up. My auto pay function is active and I am unable to stop it draining my limited bank balance.
4	Have been using Paytm for more than 5 years but for the past couple of weeks upon opening the app, an error appears 'Warning [00000] Device Environment is not correct' and then the app closes after a few seconds. I have tried emailing Paytm support but after more than 4 days, there is no update.
5	I have been using Paytm for a long time, and it has truly simplified how I manage my daily finances. It is much more than just a payment app — from quick UPI payments to managing monthly bills and expenses, everything is incredibly fast and secure.
6	Off late Paytm is creating problems in terms of some bugs — glitches during a payment or when checking balance or monthly summary are highly irritating. During the most tough times for Paytm I never left this app, so when it starts behaving erroneously that's super frustrating.
7	I really like using the Paytm app. It is very helpful and easy to use. Even when my internet data is finished, I can still pay bills or recharge my mobile easily. This feature is very useful in emergencies. The app is fast, simple, and saves a lot of time.
8	I am writing this after exhausting every possible channel. I have reported a fraudulent transaction, yet instead of receiving immediate human assistance, I was repeatedly pushed into an automated chatbot loop that refused to connect me to a real support agent.
9	Bill payments are failing every time now (it takes 1 or 2 days to fetch the actual payment status, leaving user in limbo whether to wait or pay again). Adding money to UPI Lite is gone — no money addition even through 'set up auto top-up'. Extremely frustrating and unfriendly for users.
10	What is wrong with Paytm — it stops working with the error 'device integrity check fail' even after switching off accessibility. This is very frustrating. And let's be honest, even if there is any issue in future Paytm will not be helping in any way.
11	I am getting the error: 'Warning [61007] Device integrity check failed. Root access or system modification detected.' My device is completely stock, never rooted, and the bootloader is locked. I've already tried toggling Developer Options, scanning with Play Protect, and reinstalling.
12	A few days ago I added an amount to my wallet, it was deducted and after that help or support are not resolved. I have sent an email but the issue has not been resolved yet after 4 days.
13	Major BRTS update bug! Scanning out at your destination does NOT complete your trip. The app keeps the ticket active for the full 3 hours and blocks you from buying a connecting ticket. There is NO manual 'End Journey' button. I was stranded midway without cash.
14	This is one of the worst applications I have ever used. I have been trying to connect with a customer care executive for the past 8 days, but only an AI bot keeps responding. My flight tickets were cancelled but I still have not received my refund.

#	Review
15	Hello, the app is great. But after I updated my phone, it stopped working. It says that some root access or system modification has been detected. I tried restarting and reinstalling but nothing works.
16	Totally unusable now. The device environment is not correct. Warning[00000]. Other UPI apps are working fine. I suspect upgrade of Android version may have caused this. Mailed support but ticket got closed without resolution.
17	Paytm is one of the worst apps when it comes to customer support. Fraud happens frequently, but when we try to report it, their system does not even register the complaint. Emails to support don't go through, and the AI chat is completely useless.
18	Just updated this app and ever since the update it keeps sending a warning 61007 which says device integrity check failed plus root access and system modification detected. I don't understand what the issue is and I've uninstalled the app for now.
19	Although it is excellent transaction app, nowadays I am unable to open the app. Every time I try, it shows 'your device integration failed. Root access or system modification detected.' I faced a lot of problems due to this.
20	Worst UI and the application is none of use. The credit card bill doesn't show accurate amount. Recharge plans are not updated for the last one year. After putting manually it says 'couldn't find the plan' and gives an error. The application is full of scam.
21	Very poor experience with Paytm Travel. My flight is in two days and a ticket raised on 5th March to modify the booking (due to the war situation) is still unresolved. Customer care never connects to an agent and the chatbot gives no response.
22	What is wrong with you guys? Initially the Paytm app was saying unable to use multiple accounts 'Error 21001'. Then it started saying the Device integrity check failed 'Error 61007'. Already sent the mail to development team, however no one has responded.
23	I've been using Paytm for a long time, and the 2026 updates are fantastic. The new AI Spend Analytics really helps me track where my money is going. I also love the 'Hide Payments' feature for extra privacy and the fact that I can download my UPI statements in Excel for my taxes.
24	I can't even open the app now. Whenever I try, it says 'device environment not correct' / 'device integrity check failed. Root access or system modification detected.' This pop-up shows even when I'm using any other normal app.
25	The app was very good and I used it for 2 years but all of a sudden since last month it's not getting opened by showing the error 61007. I don't want to use any other payment mode except Paytm but now I am helpless.
26	I've been unable to log into my account using my phone number for the past 2 weeks. Every time I try, it keeps telling me that the verification has failed. Even if my network is fine and I receive the OTP, the verification fails.
27	I don't know why I can't use Paytm anymore. It got frozen on splash screen. I am running this app in Moto secure folder for increased protection. Otherwise people may be able to send money from Paytm wallet without password.
28	I was using this app since 2012 and it was working smoothly but now from few months I am unable to use the app as it shows some error that I am not using standard applications on my phone.
29	Support in cases of frauds is not efficient enough even after sharing cyber crime acknowledgement and all screenshots for evidence. It's risky to keep this in our devices especially if BHIM app is linked with this.
30	I frequently use Paytm for loan repayments, but I am disappointed that it doesn't allow partial or custom amount payments. The app forces users to pay the full outstanding amount at once. Adding a flexible payment option would be extremely helpful.
31	The app provides faster payments, rewards and amazing UI. But previously I got an error [00000] Device environment is not correct. After updating it showed [61007] Device integrity check failed. Tried many ways to fix but unfortunately all efforts are wasted.

#	Review
32	Good for making payments, but irritated by the sound when making payment and there is no option to switch off the sound. Even after switching off the notifications, the sound is too loud and irritating.
33	I booked a flight through Paytm app. The flight got cancelled by airlines. Refund not yet received. Trying to contact customer care from 10th March onwards. The email to customer care is not delivering.
34	I booked my flight but after paying the email I received confirmed booking for 9AM instead of the 2PM flight I selected. If you are charging Rs 800 as convenience fees then why does the interface have such issues?
35	App is not working on my mobile. Warning [61007] Device integrity check failed. Root access or system modification detected. I do all my financial transactions through this app and I'm very worried.
36	Since 27th March morning this app is showing error: Warning [61007] Device integrity check failed. Root access or system modification detected. I tried clearing cache, reinstalling, restarted but nothing worked.
37	Currently, I'm unable to open the Paytm app on my mobile device even with the latest updated version. My mobile Android version is 7.1.2. Earlier I didn't have this issue. I'm very habituated with the Paytm app and its services.
38	Upgrade to 10.75.1 causes crashes and says device environment is not correct. Previous version of the app worked perfectly. Customer support is also just a bot which doesn't understand and just keeps looping.
39	The split bill feature has many bugs and is not user-friendly. For splitting bills, Paytm forces me to use another app. Many other apps have since improved this feature, but Paytm has not.
40	Disappointed — Rupay credit card not linking. Had tried many times but struggling. Chatbot is there but not helpful. No helpline number, no customer care mail ID. Totally fed up.
41	Most frustrating app ever. I have moved to Google Pay for everything. My gold is on this app, I just can't buy more. Error on UPI, on credit card and debit card, all in the name of security. My card has been there since 6 years.
42	Randomly ceased me from using the app, with the warning device integrity check failed, even though my device is not rooted. I trusted this app and have been using it loyally for years. I don't think I can trust this app again.
43	The application provides a 'Refer and Earn' feature, but the referral verification process does not work properly. When a user installs the app through the referral link, it shows a verification error. This is a poor user experience.
44	I am unable to open the app as it displays the error 'Your device environment is not correct'. Additionally, I cannot contact customer care since it requires me to log in first.
45	The app is asking to select which SIM to be selected for sending SMS. Also the 30 second wait is very low for low network coverage areas. Also switching apps is not permitted making it difficult if the code is not auto-populated.
46	Suggestion: it would be better if we can get the sum of credit and debit for each phone number/bank account we are sending to or receiving from. This helps for analysing how much we have paid to or got from that particular person.
47	App is showing an error code (61007) Device integrity check failed. Root access or system modification detected. Why is it showing this error? I have done nothing in my phone.
48	I booked a flight ticket from Jaipur to Mumbai. Money is debited but the ticket is not yet received. I was told I'll get a full refund but waiting since 3 days with no update. No one is available to connect, only bot chats everywhere.
49	For the last one month I am facing issues while paying or checking balance, a blank page covers the app. Another issue with Paytm Lite where I can neither check balance nor pay anything.
50	Totally frustrated — it shows 'Device Environment is not correct'. I did everything: clearing cache, storage, updating app, but it's not solved. Finally looking for another alternative. Note: problem was later solved automatically.
51	The worst scammers when it comes to cashback — I got so many cashbacks but they disappear from the app within a minute. I did many transactions by believing this strategy but they cheated so many times.

#	Review
52	After last Paytm app update the app suddenly stopped working and shows 'Device Environment is not correct'. Before the update this app was working fine. As per your requirement I sent all the details via email but till date my issue is not resolved.
53	Worst customer service. I have raised so many tickets but none of them solved my issue. They always tell me the same answer. When I use their service it's their duty to solve the issue but they say 'We cannot solve it, we are third party.'
54	I have been using the app for the last 10 years and am much satisfied so far. However after a recent update it stopped working completely. I tried a few hacks from YouTube but they failed. Error: Device Environment is not Correct.
55	I need help — I love using the app but from last night my Paytm app keeps crashing again and again. On the screen it says 'device environment is not correct'. I can't even contact customer service.
56	After receiving the recent update it's asking to 'factory reset' my phone as the firmware detected is not genuine on the same phone it was working before. Now it has stopped working with a nagging warning screen.
57	Paytm has still not enabled the physical gold withdrawal option. I have been waiting for many months. If I try to withdraw the gold amount as cash, around 3% is deducted from the gold value. Please enable physical gold withdrawal.
58	Unable to use the app for last few days. Uninstall and update everything has been done many times. When I open, it shows 'Device integrity check failed, root access or system modification detected.' My phone is not modified.
59	A very appreciating service provided by Paytm. However I am facing an issue — it shows 'Warning [00000] Device environment is not correct.' My device is not rooted and I am using the official version from Google Play Store.
60	I am using this app from 7 years. Today some error Warning 60017 is coming. Device integrity check failed. Root access or system modification detected. Please fix. The problem is now fixed.
61	I had a very bad experience — I tried to recharge my Jio SIM for last 3 months but the app did not allow me to proceed to the payment page. It kept failing and wasted a lot of my time. Very disappointing experience.
62	The app is not working. From last some years I have been using this app but suddenly a security message pops up on my phone screen and the app closes. There is no chance to fill code, password, or phone number to start the app again.
63	Facing error 61007 'Device integrity check failed' on my Redmi 14C even though the phone is completely stock. No root, no custom ROM, and developer options are disabled. This seems like a false detection issue.
64	This is a horrible app. One day it shows your investments, the next day your portfolio becomes zero. There is no transparency at all. It doesn't clearly show how much you've invested, and when you redeem funds there is no proper status update.
65	Facing Error [61007] 'Device integrity check failed' on my Redmi 8A for the last 1 month since a recent app update. My phone is completely safe and NOT rooted. Other UPI apps like GPay are working perfectly fine.
66	Cannot check balance in UPI with latest update. Every update feels like a gamble that one new thing will break. Was asked to raise a request and greeted with 'Sorry, We are experiencing high traffic.' Uninstalled this app.
67	Since you guys changed the Paytm wallet system I haven't been able to use my wallet money. KYC status has been temporarily unavailable for 1.5 years. Customers can't access their own money due to your mistake.
68	Worst customer care. Agent is nonsense. There is no way to reach human support. Tickets raised won't be looked up. No way to get the status of tickets. Either the agent will block you or keep lying about technical issues.
69	I want back my stuck money in UPI Lite to my main account but after many days I didn't get my stuck money. I raised a ticket to help center but it showed incomplete verification and I can't get my money back.

#	Review
70	Payment status shouldn't keep users waiting 2-3 days. One can't wait 2-3 days at the shop to confirm payment. Too many failed transactions in pending status. Either fail with payment not deducted, or succeed.
71	Getting issue of Device environment is not correct. One month has completed but no resolution from Paytm. New errors are generated (device integrity check failed) and I am not able to use the app. Requesting to delete my account.
72	If you unlock your phone then the app doesn't require fingerprint or pattern to unlock, which is not safe. A separate PIN option to unlock the app should be brought back.
73	I sold my Paytm Gold on 29 Jan 2026, and the amount is still not credited. The app options do not exist, and customer support has been unhelpful, redirecting me repeatedly. Paytm must take responsibility immediately.
74	It's all fake — what you are assuring to give cashback for new users is all fake. They are not providing it. I have raised a complaint but no one has responded. They are just providing a ticket number.
75	Can't open due to 81004 error. My phone is mine, not Paytm's. If I have an app that needs accessibility access for legitimate reasons I should be allowed. Instead there is a blanket block on any device with any app using accessibility features.
76	Still not working, no response from the email mentioned by Paytm. Same error: not able to open this app as it is giving error — device environment is not correct.
77	Unable to activate my bank account after MNP. The app crashes while trying to send SMS to verify my number, happening repeatedly despite updating the app. There seem to be some bugs.
78	It is not functional even after uninstalling and reinstalling and even after restarting the phone. Some error message is coming saying that screen sharing is not allowed.
79	Money disappeared from my balance with no clear transaction. This is unacceptable and shows zero transparency. A payment app should not make users question where their own money went.
80	When I open the app it says 'Device environment is not correct'. Tried every method like turning off developer mode, clearing cache, reinstalling app, updating phone software. Still having the same issue.
81	After updating to the latest version, the app shows 'Device environment is not correct [00000]' and does not work. My device is not rooted, Play Protect is certified, and the older version works fine.
82	Worst app to use — eligible transactions don't get entry to existing offers, doesn't give cashback, users have to manually activate offers. Customer support team never understands what user is saying. The app is laggy and so slow.
83	I am facing an issue while opening the Paytm app. It shows: 'Warning [00000] - Device environment is not correct.' My device is not rooted, Developer Options are turned off, and I am not using any cloned or parallel apps.
84	This app has a serious bug. I bought my air ticket and my age in the ticket is showing as 36 instead of 53. The support is only bot support without any human agents. You guys are sending a default DOB value of 01-Jan-1990 to airlines.
85	I am unable to open the app, getting a 81004 Warning for keeping Accessibility settings and Developer options enabled on Android, which I cannot disable as I develop Apps. Note: Issue was later fixed by Paytm.
86	I am a loyal user of Paytm, choosing Paytm over every other UPI app. However I can feel the app is not as optimised as other UPI apps on cheaper phones. Other apps feel way more optimised and use less battery than Paytm.
87	There is a problem showing — device integrity check failed. Root access or system modification detected. Yesterday there was no problem but today this pop-up shows when I want to start Paytm service.
88	Frustrating experience with Paytm! As a power user, I need to allow certain apps to use accessibility settings, but Paytm's constant warnings are making it unusable. Looking for alternatives, sadly.

#	Review
89	I booked a flight via Paytm and the flight was cancelled by the airline. The airlines gave full refund to Paytm but it has been more than 7 days and I didn't get any refund. The customer care number is unreachable.
90	Automatic payments are getting deducted and there is no proper way to stop them. There is no customer care number available and the in-app support is useless. This has caused financial loss and a lot of frustration.
91	Till today the app was running smoothly but since last 5 days I have been facing relink of bank account issues. Bank account was accidentally deleted and trying to relink shows 'multiple IDs registered'.
92	I am using this app for 5 years but now after an update it shows 'device environment is not correct'. Even after mailing them they have not resolved the issue.
93	I don't know why the warning window is predominantly visible since 2 days when I try to open the app, saying 'Device environment is not correct'. I'm not able to make any transaction.
94	I used to love this app for its amazing services. But nowadays I can't open the app. It says 'error, device environment is not correct.' I've tried everything — reinstalling, clearing cache — but nothing worked.
95	Recent transactions are missing in the 'Balance & History Tab' which should hold recent payments. Why is the developer saying I had a great review when I mentioned the problem?
96	After updating to version 10.75.3 the app is refusing to open with error 'Device integrity check failed. Root access or system modification detected.' I am on Android 10 and my phone is not modified in any way.
97	Unable to send balance check and payment in my Paytm application. My registered SIM card is already active with full recharge. Still verification is not happening. I have lost Rs. 325 because of this.
98	Very disappointed after latest update — upon clicking to open the app, it automatically closes and kicks me out to the home screen. The app keeps crashing and does not even load. It was working perfectly before the update.
99	This is a very good UPI payment app and I have never faced any issues. Suggestion: at the end of the month the app shows time and date of payment and category but it doesn't tell me exactly what I spent my money on.
100	I am using a Realme C25-Y and suddenly I'm unable to open the Paytm app. It shows 'Device environment is not correct [00000]'. My phone is not rooted, and Developer Options are also turned off.
101	After the recent update, the app keeps showing 'Device environment is not correct' and I'm unable to access Paytm. I also received repeated notifications about this error, which is very frustrating.
102	Unable to open app — Error 61007 showing. Tried everything from rebooting phone to uninstalling app. Note: it is now working fine.
103	Third class app. There is no way to reach customer service and account verification always says the popup closes in 5 seconds. All the amounts invested with Paytm are now not accessible.
104	I am so frustrated with this app customer support. I booked my flight tickets almost 2 months back and cancelled last month due to some issue. I had a refund of more than Rs 9000 and it has not been refunded so far.
105	I have been using this since 4 years and it was working nice. But suddenly the app doesn't open showing that device environment is not good. I checked my device more than 10 times and found nothing wrong.
106	Paytm is a very convenient and reliable digital payment app. It makes sending money, paying bills, and doing mobile recharges quick and easy. The interface is simple, and the transactions are fast and secure.
107	Device Environment is not correct showing every time and not opening app. Many methods have been done like reinstall, developer option is off, not using VPN, software updated, no third-party app. Please solve this ASAP.
108	The app is quite good. But now it is showing error 61007. I have tried everything recommended by others. But nothing has changed. It is showing device integrity failed. Root access or system modification detected.

#	Review
109	Such a pathetic experience. It went smooth for some time and when I last updated it the error kept popping and I was unable to use my own money. I tried to connect customer support multiple times but was unable to connect.
110	I'm writing to bring to your attention that I've been facing error 61007 while trying to open the Paytm app. Despite trying multiple times and reaching out to support, the issue remains unresolved.
111	I had booked a bus ticket through the app and the payment was successfully deducted from my account, but the bus never arrived. No agent answered the calls at the boarding point. Customer helpline never connects.
112	I have been a loyal Paytm and Paytm Payments Bank user for over 10 years. Since the recent update, I am unable to access my account due to Error 000. My device is not rooted and I have tried clearing cache and reinstalling.
113	I am unable to send balance check and payment in my Paytm application. My registered SIM is already active. Still verification is not happening. I have tried all UPI applications — the problem occurs only in Paytm.
114	I have been using this app for around 10 years and was happy with its safe transactions. But last 2 days I'm finding it difficult to open the app as some warning is reflecting on the screen.
115	I've been using Paytm for a long time now, but suddenly it stopped working on my device stating system integrity check failed, even when there is no suspicious activity in my phone.
116	It keeps crashing and says device integrity failed, even after updating and reinstalling. Kindly let me know how to reach customer care.
117	I am not able to use this app from last month. Whenever I try to open the app it automatically gets closed and shows a 'Device integrity is failed' message.
118	App is crashing and closing automatically. This is the only feasible way to let the developer team know. Please sort it ASAP.
119	I am using this app in 4 years. But now after 7 days it shows 'device environment is not correct'. Even after multiple attempts it does not open. Very disappointed.
120	I got a system update on my Vivo T3 Pro and after the system update the Paytm app stopped working. Error shows 'Device integrity check failed. Root access or system modification detected.'
121	App Not opening — showing error 61007. Device integrity checked failed. Root access or system modification detected. I never rooted my phone. I only updated my phone to Android 16.
122	My Paytm shows device environment is not OK. Just a few days ago Paytm was working well but now I am not able to use it. Tried uninstalling and rebooting but still Paytm is not working.
123	Paytm is not working properly — 61007 error showing from last 2 days. Tried to settle the issue multiple times, many times updating and reinstalling but not working.
124	I have installed the app on my new phone but it is not even working. It keeps showing device integrity failed. How is it possible on a brand new phone?
125	When I opened the app it was showing device integrity checked failed. Root or system modification detected. I'm not able to use the app. Contact me soon.
126	Ridiculous non-standard firmware error repeatedly appearing although I am using official firmware from my manufacturer. Cannot use the app. DEVICE INTEGRITY CHECK FAILED error 61007 appearing frequently.
127	After updating to Android 16, Paytm is showing an error 61007 — device integrity problem. No other UPI app is showing this issue. When will the Paytm team debug this error?
128	Earlier it was good but now after the latest update my app is not at all working. When I try to open it, warning 61007 is seen. My phone is Infinix Smart 4 and app is version 10.76.0.

#	Review
129	After changing my phone my application is not working at all. It's showing device integrity check fail. Root access or system modification detected.
130	Still now it was a very good app. But for the last two days, without any message or intimation, the application simply stops working. No customer care call is working either.
131	There is no option to talk to customer care — my bill payment is stuck for 3 days but I haven't got my money back or booking done. The AI chatbot provides no assurance from Paytm.
132	Raised refund request ticket 5 days back. AI bot says escalated to human and I will be contacted. No response. No human to talk to. This is my last transaction as Paytm does not care about its long-term customers.
133	Device root access is shown again and again but it does not give the option to login. I have tried everything but it does not open. I called customer care but there is no solution.
134	I am facing problems using the Paytm App. At the opening of Paytm it shows: WARNING {00000} 'Device Environment is not Correct.' Awaiting your response.
135	Not able to access Paytm app for last few days. Error showing device integrity check failed, root access or device modification detected. Reinstalled Paytm and reset mobile but same issue.
136	Again and again, same issue. Still unable to open and use the app after recent 10.76.1 version update. The app crashes instantly when opened. I don't have any other UPI payment app installed.
137	It shows 61007 error after my iQOO phone software update. Developer options and USB debugging are off. The Paytm app is completely updated. I don't understand what's wrong.
138	My Paytm app is not working from 15th February. I have no customer care contact number. My Paytm shows device environment is not correct, now showing device integrity check has failed.
139	Using OnePlus Nord CE 5 on OxygenOS 16.5. Paytm app shows error 61007 (Device integrity check failed). Developer options are OFF, no rooted apps, and no clones. This started after the March 2026 security patch.
140	Indane booking not created. Need refund of Rs 937.5 urgently. It's been 5 days with no reply. I have raised a ticket also. Very bad service by Paytm.
141	Why is there a device integrity problem? Within the week there are many videos about it and posts on the internet and today it is causing problems for me too. Fix your app.
142	Hello sir, there is an issue of device integrity check failed and Paytm app shows error 61007. I can't open my app for any payment. Please resolve my issue as early as possible.
143	I am making payment through Paytm but the payment is not happening. Small transactions are happening but transactions of more than Rs 5000 are not happening.
144	Device Rooted Problem when my device isn't rooted. Nothing has happened to my device. Realme C21Y. I have sent the details and there is no solution yet.
145	The scanning takes too much time after new updates. I don't want to see a blue light floating over my screen. Make my payment instant.
146	I paid my IGL bill through your app and the payment was shown as successful. However, it has not been reflected with IGL and I am again being asked to pay the bill despite the earlier payment being visible.
147	Please don't download this application because automatic payments option are not turning off. It cannot solve any problems. This app is very careless.
148	Bakwas App. Nobody should use it. Don't fall for Rs 50 cashback in Flipkart for Paytm dormant users. The cashback will never be credited. Scratch card has validity of only 2 days.

#	Review
149	Paytm has been unresponsive for the past few months. It's not working even though I've updated it. This is the second time Paytm hasn't opened.
150	I'm getting 61007 error, despite doing a full factory reset. I have tried multiple integrity checker apps, all of them gave strong integrity message. Fix your app — I have bills to pay.
151	Till now it was most entertaining features and customer friendly, but for the last two days without any message or intimation the application stops working. No customer care call is working.
152	I cannot access Paytm app for last one month. Every time it shows 'device environment is not correct'. I've tried all the things but it's still showing the same.
153	I was unable to use Paytm since 17th February 2026 after the update. Error 61007 despite trying all possible fixes. Now relying on GPay and my bank's mobile app for transactions.
154	I feel so safe making transactions through Paytm — it's a very easy way to give or take money from people. This UPI app is very useful and mainly reduces the travelling time and saves time.
155	Please give an option to disable the sound effect after transaction is done. That is an in-app sound that should be picked from media sound level but it's getting picked up from notification sound level.
156	The customer support help section of the app is simply a merry-go-round with no way to speak with an actual person. I tried to explain my problem with multiple requests and screenshots but with no resolution.
157	It's a good app to have for transactions and payments. Suggestion: please give notification for payments of UPI Lite — that would be great.
158	After the recent update, the app's notification pops up saying 'Accessibility settings are turned on, please disable them for security concerns.' What security concerns? It was working perfectly in the previous version.
159	In my new device Motorola G57, Paytm app is not working, reflecting the message 'your device environment is not correct.' I've tried every possible step to start the app. My device version is Android 16.
160	The app is awesome. But after their latest update, it's not working. It keeps saying 'device environment is not correct.' I tried to reinstall and everything but it's not working anymore.
161	App is completely unusable after the latest update. Getting Error 61007 (device integrity check failed) immediately on launch. My phone is not rooted and is Play Protect certified. Other payment apps work fine.
162	Worst customer support experience ever. Booked a flight ticket, cancelled it, and refund is not yet delivered. It's been 23 days and no one is available in call for customer care. The AI assistant loops in cycles.
163	Why is Paytm so careless in pushing untested updates? Getting error 61007 even after updating the app. Other UPI apps have no issue. Request to resolve the bug or will have to switch to other platform.
164	It's all fake — the cashback assured for new users is not provided. Raised a complaint but no one has responded. Just providing a ticket number with no resolution.
165	Can't open due to 81004 error. I should be allowed to have apps needing accessibility access for legitimate reasons. The only solution I found was to uninstall Paytm and use another app.
166	Money disappeared from my balance with no clear transaction record. This is unacceptable and shows zero transparency. I'm a student and this is my lunch money. Completely disappointed.
167	When I open the app it says 'Device environment is not correct'. I tried every method but still having the same issue. Model: Samsung Galaxy F02.
168	Worst app to use. Eligible transactions don't get entry to existing offers. Doesn't give cashback. Users have to manually activate offers. The app is laggy and slow. Worst AI support chatbot.

#	Review
169	I am facing an issue while opening the Paytm app. It shows 'Warning [00000] - Device environment is not correct.' Developer Options are turned off and I am not using any cloned or parallel apps.
170	This app has a serious bug. I bought my air ticket and the age is showing incorrectly as 36 instead of the correct age. You guys are sending a default DOB value of 01-Jan-1990 to airlines.
171	I am unable to open the app, getting a 81004 Warning, for keeping Accessibility settings and Developer options enabled on Android. Note: the issue was fixed at an amazing pace.
172	I am a loyal user of Paytm. However the app is not as optimised as other UPI apps on cheaper phones. Other apps feel way more optimised and use less battery. Please focus on optimising for cheaper phones.
173	There is a problem: device integrity check failed. Root access or system modification detected. Yesterday there was no problem, but from today the pop-up shows when I want to start Paytm.
174	Frustrating experience! As a power user I need to allow certain apps to use accessibility settings, but Paytm's constant warnings are making it unusable.
175	I booked a flight via Paytm and the flight was cancelled by the airline. Airlines gave full refund to Paytm but it has been more than 7 days with no refund. Customer care number is unreachable.
176	I don't know why the warning window is visible since 2 days when I try to open the app, saying 'Device environment is not correct'. Not able to make any transaction.
177	I used to love this app. But nowadays I can't open it. It says 'error, device environment is not correct.' I've tried everything but nothing worked.
178	Unfortunately I am not able to use Paytm app because it shows 'Device Environment is not correct' from yesterday. I tried factory reset but the same problem exists. I am using Paytm almost daily from past 7 years.
179	I have been receiving regular emails from Paytm that my KYC is not in line with their terms, but when I click on the option to complete it in the mail I get a pop-up saying something went wrong. Where is the 24x7 help?
180	Worst update ever. Every time I scan a QR, it forces fingerprint payment setup. Whether I tap yes or no, it redirects and triggers a bank message saying a 'cooling period' has started, limiting me to Rs 5000 UPI limit for 24 hours.
181	Device integrity check failed. Root access or system modification detected. Pop-up observed on phone every 30 seconds after upgrading the app, and app not opening.
182	App is good and works well. The only reason for giving 3 star is that the rewards shown and being received are totally opposite. When contacting customer support they say the reward scheme has ended, yet it's still being displayed.
183	I booked a flight through Paytm but the flight didn't get confirmed and my payment of Rs 48,205 got stuck. There is no customer support — only a bot is chatting with us.
184	I really like this app but after the last update I am having an issue. I use AVG anti-virus app to secure my phone, but now Paytm is not working because I enabled accessibility for the anti-virus app.
185	Paytm app keeps stopping again and again. Not able to see even the UI. This has been happening for the last 7 days. I have already tried uninstalling and reinstalling.
186	Very poor experience with Paytm bus booking. Bus was 4 hours late and there was no proper support for cancellation. Paytm helpline was useless, and the travel agency refused to help.
187	I'm struggling to foreclose a loan taken from Paytm app. I'm not getting any support from Paytm. The link provided navigates to Paytm app only and I'm getting no support there.
188	I'm deleting this app. Most of the time, payments are lost in processing. This morning I purchased a metro ticket and the payment was processed but it was late, so I had to buy the ticket in cash, losing money.

#	Review
189	This app is very harassing. In a few days it's not open and shows error 61007 device integrity failed. Other apps are working smoothly. I tried clearing cache, uninstalling, reinstalling and various things but nothing worked.
190	The app is not properly compatible with dark mode. While entering the payment amount, the amount is not clearly visible. Please fix the dark mode compatibility issue.
191	I'm getting 61007 error despite doing a full factory reset. I have tried multiple integrity checker apps, all of them gave strong integrity message. Fix your app — I have bills to pay.
192	Till now it was very entertaining features and customer friendly, but for the last two days without any intimation the application stops working. No customer care call is working.
193	I have the latest Android version and no developer option activated, still the app shows 'Device environment not correct'. I've been trying for so long but it's still not working.
194	Unable to redeem my daily SIP amount. So many times I put the request for a call but didn't receive a single call. It seems Paytm wants to make a big scam with many people.
195	This app was very operational in the past. Now it's not opening after uninstalling and reinstalling repeatedly. I couldn't find the reason.
196	Unable to use the app on my brand new Pixel 10 Pro XL. App keeps saying 'device integrity check failed. Root detected' even though I haven't rooted my device and it's brand new.
197	I want to connect with your agent from yesterday. After raising ticket no one is responding. My issue is I have already done my postpaid repayment but the amount is not updated.
198	I had booked a flight through Paytm but the flight got cancelled. The airline has refunded the money to Paytm but Paytm didn't refund to my account. Paytm told me 6 days ago they would refund but I have not received it.
199	Paytm is very bad for flight booking. I booked a flight ticket and due to Google auto-fill my surname changed. Trying to contact for 4 days continuously — only a chatbot in a loop.
200	I lost Rs 4000 in Paytm UPI without any notification or message. I messaged in Paytm support but there is no proper response. Money was deducted on March 31st 2026. Please resolve this issue.
201	I am facing 61007 and 61009 issues. I am a loyal Paytm user. Uninstalling and will probably never use the app again.
202	I received an MI update on my Redmi Note 13 midnight and since then the Paytm app isn't working. Error: Warning [61007] Device integrity check failed. Root access or system modification detected.
203	For over one month, the highest amount is not set up and I am receiving the message 'we are unable to fetch details'. Due to this I have to put my PIN for small amounts too.
204	Very poor experience with Paytm bus booking. Bus was 4 hours late with no proper support for cancellation. Paytm helpline was useless. Not recommended.
205	Struggling to foreclose a loan taken from Paytm app. Not getting any support. The link provided navigates to Paytm app only with no support there. No customer care number.
206	I'm deleting this app. Payments are lost in processing. I purchased a metro ticket and the payment was processed but was late, so I had to pay cash. They don't even refund the money.
207	This app is very harassing. In a few days it's not opening — showing error 61007 device integrity failed. Other apps are working smoothly. I tried everything but it didn't work.
208	The app is not properly compatible with dark mode (mobile default). While entering the payment amount, the amount is not clearly visible.

209	I have the latest Android version and no developer option activated. Still the app shows 'Device environment not correct'. I've been trying for so long but still it's not working.
210	Unable to redeem my daily SIP amount. Many times put the request for a call but didn't receive a single call. Paytm seems to want to make a big scam with many people.
211	I have paid for postal life insurance. Payment is still pending from the last 24 hours with no immediate response from Paytm team.
212	Can't use this app. It's always giving the message that my phone system is modified. I tried all the things like reset and restart but nothing is useful.
213	Never use this app. Uninstall it and shift to another app. Fraud app showing device integrity check failed error 61007. Interestingly, Paytm Business app is working perfectly on the same mobile.
214	This app trapped me! Always server issue! Today I tried to pay at a groceries store and for taxi fare but I couldn't pay. Very disappointed. I walked 12 km by foot with my brother.
215	I am not able to use Paytm app for around one month. Every time I try to open it shows 'device environment is not correct'. Kindly do the needful to solve my problem.
216	Paytm app keeps stopping again and again. Not able to see even the UI from last 7 days. Already tried uninstalling and reinstalling. Kindly resolve this issue ASAP.
217	I have been using Paytm for years. App's notification pops up saying 'Accessibility settings are enabled. Please disable them for security purposes.' Accessibility is for a reason — it helps people with hearing or vision issues.
218	Slow application — when we click on buttons it takes time. When we open the app the camera activates automatically. Dark mode not available. Bill payments not available. Overall good app but needs improvement.
219	I can't even open the app now. Constantly showing 'device environment is not correct' message and error 0000. This is causing too much inconvenience as I cannot do any online transactions. Android 11 version.
220	The customer service is non-existent. I'm getting a popup as soon as I open the app reading 'security alert! Following apps can be used by fraudsters to steal your money'. The said app is Battery info which is preinstalled on my phone.
221	Since for a month I am unable to use Paytm app in clone mode. I don't have developer mode enabled and no accessibility setting. The clone app just freezes on the home screen.
222	This personal loan app is very useful. The application process is simple and approval is quick. Interest rates are reasonable and there are no hidden charges. Customer service is also good.
223	In my new device Motorola G57 Paytm app is not working. It reflects the message 'your device environment is not correct.' I've tried every possible step. My device version is Android 16.
224	The app is awesome. But after the latest update it's not working. It keeps saying 'device environment is not correct.' I tried to reinstall everything but it's not working anymore.
225	Worst customer support experience ever — booked a flight ticket, cancelled it, and refund is not yet delivered. It's been 23 days and no one is available in call for customer care.
226	Why is Paytm so careless pushing untested updates? Getting error 61007 even after updating. Other UPI apps have no issue.
227	I sold my Paytm Gold and the amount is still not credited. Customer support is unhelpful and redirects repeatedly without resolution.
228	I should be allowed to have legitimate apps needing accessibility access. The only solution I found was to uninstall Paytm and use another app.

229	Tried every method like turning off developer mode, clearing cache, reinstalling app but still having the same issue with 'Device environment is not correct.'
230	After updating to latest version, shows 'Device environment is not correct [00000]'. My device is not rooted. Please check compatibility issues.
231	Worst app to use. App is laggy and slow. Customer support team never understands what users are saying. Worst AI support chatbot.
232	I am facing an issue while opening the app. It shows 'Warning [00000] - Device environment is not correct.' My device is not rooted and developer options are turned off.

Privacy Policy & Terms and Conditions

Company: One97 Communications Limited

Website: paytm.com / pages.paytm.com/terms.html

Last Updated / Sourced: April 2026 (Sourced from official Paytm terms)

This document compiles the key privacy policy provisions and terms & conditions as publicly available from the official platform. It is intended for informational purposes. Always refer to the official website for the most current version.

PART I — PRIVACY POLICY

Overview & Identity

This Privacy Policy is published by One97 Communications Limited (Paytm), registered at 1st Floor Devika Tower, Nehru Place, New Delhi - 110019 and headquartered at B-121, Sector-5, Noida - 201301, Uttar Pradesh, India. The policy governs all data collected from users through the Paytm applications, desktop website, and mobile WAP site. By downloading and using the Paytm application/website, you expressly consent to the use and disclosure of your personal information in accordance with this policy.

Data Collection

Paytm collects Personal Data which is information directly or indirectly identifiable to you, including: name, email address, phone number, date of birth, financial information (bank account details, credit/debit card information, other payment instrument details), physical/physiological/mental health condition (for relevant services), biometrics, and other sensitive personal data. Data is collected on a need-basis with your express consent. Paytm does not access your device files, media, contact lists, call logs, or other telephony functions.

Purpose of Data Use

Paytm uses your personal information to: provide requested products and services; resolve disputes and troubleshoot concerns; promote safe services and detect fraud; collect money and process transactions; measure consumer interest; inform you of offers, products, services and updates (with consent); customise your experience; detect and protect against error, fraud and criminal activity; enforce terms and conditions; and comply with applicable laws.

Data Storage & Retention

All Personal Data is stored at data centers located in India. If data needs to be sent for processing to servers outside India, it shall be returned within 24 hours of processing and deleted from foreign servers within the same timeframe. Data is retained for 6 months or until consent revocation or until the purpose is satisfied or as required by applicable law, whichever is earlier.

Data Sharing

Paytm may share your personal data with: affiliated companies and group companies; service providers and partners under contractual obligations; competent legal, statutory, regulatory, or governmental authorities as required by law; and credit bureaus or financial institutions for relevant financial services. Paytm does not sell your personal data to third parties for marketing purposes.

Security

Paytm implements stringent security measures including secure server access for account changes and strict security guidelines protecting data against unauthorized access. The platform employs device binding to prevent login from unrecognized devices. Paytm complies with the Digital Personal Data Protection Act, 2023, the Information Technology Act, 2000, the IT (Reasonable Security Practices) Rules, 2011, and RBI Digital Lending Directions, 2025.

User Rights & Grievances

Users have rights under the DPDP Act 2023: right to access, correct, and erase personal data; right to withdraw consent (subject to conditions). Grievance Officer: Aditya Ranade, Nodal Grievance Redressal Officer, Email:

nodalofficer@paytm.com, Phone: 01205083345, Address: One Skymark Tower-D, Plot No H-1 OB Sector-98, Noida - 201304. If unsatisfied after 30 days, users may escalate to the RBI Ombudsman at cms.rbi.org.in.

Governing Law

This Privacy Policy is governed by the laws of India and is subject to the exclusive jurisdiction of Courts at New Delhi, India. The policy may be updated at any time; users are encouraged to review it periodically.

PART II — TERMS & CONDITIONS

Introduction & Applicability

Please read the following Terms and Conditions carefully before registering on, accessing, browsing, downloading, or using the Paytm Platform (paytm.com and all associated sites/apps) operated by One97 Communications Limited (Paytm), registered at First Floor Devika Tower, Nehru Place, New Delhi - 110019. These terms govern Paytm Services including recharge, bill payment, digital products, semi-closed wallet, and marketplace services.

User Eligibility

To use Paytm Services, you must be an Indian citizen above 18 years of age. Participation by minors is strictly prohibited. You must have the legal capacity to enter into a binding contract under Indian law. By registering, you confirm you meet these requirements.

Intellectual Property

All visual interfaces, graphics, design, computer code, products, software, and other elements of the Paytm Services and Platform (Materials) are protected by Indian copyright, trade dress, patent, and trademark laws, and international conventions. All Materials, trademarks, service marks, and trade names are the property of Paytm. You agree not to remove, obscure, or alter any proprietary rights notices.

Third-Party Content

Paytm may link to or display content from third-party websites/applications. Paytm is not responsible for the privacy practices or content of those linked sites. Third-party content is provided for general informational purposes only. Paytm does not guarantee the accuracy of third-party content and shall not be liable for any loss arising from reliance on such content.

Communications & Notices

Paytm may communicate with you via email, SMS, push notifications, regular mail, or platform postings. Notices to Paytm must be sent by courier or registered mail to One97 Communications Ltd., B-121, Sector-5, Noida, Uttar Pradesh 201301, India. Grievances can be emailed to grievanceofficer@paytm.com.

Prohibited Activities

You agree not to use the Paytm Platform for unlawful, fraudulent, or abusive purposes; to infringe intellectual property rights; to transmit harmful or offensive content; to circumvent security features; or to engage in any activity that violates Indian laws or regulations.

Limitation of Liability

Paytm's liability for any loss or damage arising from your use of the Platform is limited to the extent permitted by applicable law. Paytm shall not be liable for indirect, consequential, or punitive damages. Paytm is not liable for issues related to visa/passport information or compliance with laws of other countries in the context of travel services.

Dispute Resolution & Arbitration

Disputes shall first be addressed amicably within 30 days of notice. If unresolved, Paytm may elect binding arbitration under the Indian Arbitration & Conciliation Act, 1996, before a sole arbitrator. The seat of arbitration is

New Delhi; language is English. Either party may seek interim relief from courts in New Delhi. Class arbitrations are not permitted.

Governing Law

These Terms are governed by the laws of India, subject to the exclusive jurisdiction of Courts in New Delhi, India. Paytm reserves the right to modify these terms at any time. Continued use of the Platform after modifications constitutes acceptance of the updated terms.

This document is compiled from publicly available information sourced from paytm.com / pages.paytm.com/terms.html as of April 2026. For the full, legally binding version, please visit the official website. This PDF is for reference only and does not constitute legal advice.
