

Bajaj Finserv App – User Reviews

#	Review
1	I like how easily payments can be made in some cases. However most of the time it shows trouble while making payment from bank. It stops whenever you want to make two consecutive payments. Also, cashback and rewards were good before but they are no longer useful, relevant or good. The four offers you get after payment are all bad and not useful. Also, they ask to complete tasks for cashback and even if you do, you will not get the offered cashback.
2	Very slow app compared to others. Cashback offers are showing but not receiving cashback — only after 2 or 3 transactions then we are receiving cashback.
3	My experience with the Bajaj Finserv app and customer support has been very disappointing. The mobile app is not working properly. Some pages load while others do not, and it frequently shows different types of errors. I even tried uninstalling the app and reinstalling the latest version, but the problem still continues.
4	Lost all my money paying bills here. They provided big offers but don't fall for it. It's a scam! Paid electricity bill 3 days back — amount was deducted from bank but it's still showing successful. There is no way to talk to customer service for payment purposes and no option to select the pending transaction when raising a dispute.
5	My account is debited but I am not able to see my card. Even customer support is missing — all replies are coming from bots. When I tried to contact the team through email I didn't get any reply. Please refund my money if you can't give proper service. Also login option is not allowing me to login in this app.
6	It is a very bad application. Neither can we talk to customer care nor does any complaint get resolved. I had put a request to change my mobile number and cancelled it. I don't understand why I paid the fee for this card when we are unable to talk to customer care and the complaint is also not processed.
7	I don't know how this app becomes number one finance app in India. I applied for a salaried personal loan of Rs 500000 but even after more than one month they couldn't verify my documents. It is still pending. It's just a waste of time app. Also I can't raise a ticket for this.
8	It looks like a fraud app. They are taking card issuance fee where after issuing of card I'm not able to view the card details. The app is also not working from last three days. Even under the relation option nothing is showing. Customer care number is not working at all.
9	Really bad experience with the app. I have paid for the insta EMI card but not able to operate my card when needed as the app doesn't open up. All other links are working except insta EMI card link and the contact us section. Customer care is also not picking up the call.
10	Completely non-functional. Avoid. I am beyond frustrated with this app. I've been trying to access my EMI details for days, but the app is stuck in a constant loop of buffering. It's impossible to manage my payments or even see my outstanding balance. For a financial services giant, this level of technical incompetence is unacceptable.
11	Completely non-functional. Avoid this app. I paid Rs 530 for their so-called 'digital EMI card', which turned out to be completely useless and provides no real benefit. They promised a Flipkart voucher worth Rs 530 but I never received it. On top of that, the app itself barely works — stuck in a constant buffering loop.
12	The app is full of garbage. So many ads, banners, and buttons everywhere making people confused. There is no human agent to answer your question, only AI agent who doesn't have half the answers. I want to do KYC, which pops up in the 'Service' section only once. If I miss it, only clearing the app data brings it back.
13	Bajaj is the worst. I bought a phone on EMI. On the due date, they first charged a bounce charge and then also deducted the EMI. I refused to pay the bounce charge and even filed a complaint on the app, but there has been no response. For the last three days, I have been receiving calls every day and each time I have to explain the whole issue again. It feels like harassment.

#	Review
14	Worst app. I made a payment of Rs 899 for Jio mobile recharge. My wallet got debited but the transaction at Jio wasn't successful. Jio says since the transaction wasn't successful the amount didn't come through. I have raised multiple complaints with email response received from Jio but no action is being taken. My requests are getting auto-resolved without any communication. It's been more than 10 days.
15	I have already paid the EMI for March and even paid advance EMI for April but the app is still showing 2nd March EMI due. Very pathetic app. Even no option to contact customer care. Even last time they charged bounce on the EMI amount I had paid with the excuse that I paid on the last day of the prior month before the due date.
16	This app is highly suspicious and potentially fraudulent. Initially they offered electronics on EMI, but after I qualified for a personal loan of Rs 70,000 their behavior changed. They answered my first few calls but now refuse to respond or pick up the phone. Be very careful with this app.
17	My internet connection is working properly with a speed of around 3 MBps and every other feature in the app works without any issue. However, whenever I try to open the 'Pay EMI' page to check my EMI updates, the app shows 'slow internet' and gets stuck. This problem happens only on that page.
18	I have been using Bajaj for a long time and have taken loans multiple times, always repaying all my EMIs on time without any delay. I maintained a clean repayment record. Based on this consistent behavior, I expected that whenever I needed financial support in the future, my application would at least be considered fairly.
19	I had a very bad experience with the Bajaj Finserv app. It is one of the worst financial apps I have ever used. The app is plagued by bugs, frequently crashes, and many of its features don't work properly. Payments get stuck with no proper update or clarity. Customer support is extremely poor — no proper response, and resolving issues takes forever. They keep adding unnecessary charges without clear explanation.
20	Very worst service. Even after making the payment well in advance it still shows overdue. Do not opt for Bajaj Finserv. Raised the request through app but till now no response. But receiving marketing calls every 2 hours. My payment of Rs 221.39 was made on 18th March and till today the app is showing overdue. Is it take 6 days to update payment amount?
21	WORST SPAMMING APP: I don't even remember signing up on this app, but get messages every few days that my loan amount has been updated or my credit card limit has been increased, even though I don't have a credit card or any loan from this company. Even manually blocking SMS won't work.
22	Worst app — they didn't show the pending EMI amount. Last one month I used this app. Very very worst application. Every time when I try to see the pending loan amount, it shows something went wrong or continues loading for an hour.
23	It is showing 'Bajaj Finserv App is not installed from trusted sources. For security reasons, it is recommended to install from Play Store'. Two times I have uninstalled and installed the app from Play Store, still it is showing the same message. This is not at all good.
24	I think the Bajaj Finserv app really needs improvement. I have had to uninstall and reinstall the app 4-5 times in the last one month. Now for the last 2 days it constantly shows 'Check your internet connection' even though my internet is working perfectly. This kind of issue is not good for customers who rely on the app for important services.
25	My loan details have been automatically changed to Hindi without my consent. As I am from South India, I am not comfortable with Hindi, and this makes it difficult for me to understand important information. When I tried to change the language, I was informed that I need to wait for 7 days. This restriction is inconvenient and does not seem user-friendly.
26	I never saw an app this bad. The creators are not really caring about this app — they only want money. I was only trying to see my EMI history and the app kept telling me I have a slow internet connection, but I was standing next to the WiFi. Even after switching to phone network the app still said slow internet connection. I can literally download 2GB in 1 minute.

#	Review
27	Worst service ever experienced from any app. I have been trying to apply for a 50K loan but sometimes I just couldn't complete it due to some error, and when I complete it after 3 days nothing happened. No calls from customer service and I'm not able to ask questions about when I will get my loan amount.
28	It is a very bad application — they charge Rs 590 unnecessarily, neither their service is good nor do you get any product on EMI. When I try to talk to customer care they don't talk to me and I don't get a call back even if I file a complaint. I have taken two cards and I am facing the same issue in both.
29	For the last two months I haven't received any updates on the loan I applied for. I don't understand why they aren't responding. I applied for a loan a long time ago and as of now there's been no response from them or from the app. Not once have they contacted me, even though they check my credit score and show I can borrow up to 6 to 7 lakhs.
30	Very worst app — even though every EMI was paid on time, they blocked my card without any valid reason. Even after a year they didn't bother unlocking my card. I requested to unblock through email and they still didn't unblock my card. I don't recommend this app to anyone.
31	This app is taking too much data and too much time to load. Even after that it's hanging so much and can't even load desired sections in my 4GB RAM phone. This app doesn't provide promised cashback sometimes.
32	The Bajaj Finance app crashes constantly and is not user-friendly at all. I often face issues viewing my card details as the screen just keeps loading indefinitely. It is frustratingly difficult to check loan details or manage card settings when the app is this unstable. The UI is unresponsive — when I click 'View Card Details' there is no immediate feedback.
33	Worst of the worst app. Can't even open my own profile and change the email. An easy thing like updating email is so hard here. Been trying to mail but got a response saying my email is not registered.
34	This is a very shoddy way of working — the names are big and the appearances are small. Even when there is money in the account, the accounts are bouncing again and again and completely ruining the credit score. I will definitely go to court for all this.
35	Easy to use but some options are not working like you can take a loan against deposit but when you try to foreclose the loan the application does not work and it shows a loading clock. Issues started after updating the application.
36	Hi, I just updated the app to the latest available version and post installation I've been facing 'slow internet, please retry' popup, despite changing the mobile network to WiFi. This is particularly appearing on the Service menu or when I'm checking my loan details.
37	The app experience is quite frustrating. It is very slow, takes too long to load, and sometimes becomes unresponsive while navigating or making payments. Even with a good internet connection, performance is poor.
38	Very disappointing experience with the Bajaj Finserv app. The app frequently lags and has multiple bugs — pages fail to load, transactions take too long, and it sometimes crashes. The rewards section also doesn't load most of the time. Many offers look attractive but don't get applied even after meeting the stated eligibility criteria.
39	Extremely poor experience with Bajaj Finance. I applied for a personal loan 7 days ago and the status has been 'Under Process' ever since. For a company that markets quick processing, a week of silence is unacceptable. There are no updates from the team and I'm still stuck waiting.
40	The app never works whenever I want to check my active loans — no document is available, very slow response. However the agents keep calling for loans and ODs but the app is worst. I don't know how much outstanding there is.
41	Don't take an overdraft facility. On the call they promised all the charges were free, but after processing, they gave excuses and cut fees from your loan amount. I have all call recordings and am going to complain to RBI. Please don't fall into this trap, especially with overdrafts.
42	Worst app experience I have ever seen. When I click on my relation number it mentions 'no relation number active' and shows a need to do re-KYC. When I click on it, it says something went wrong. It's too slow and whenever I select any option it takes a lot of time and many times fails.

#	Review
43	Hey Sir, this app hasn't been working on my phone for the past month. I had a total of six EMIs but I've paid four, yet it still shows three pending. The details aren't showing and the app isn't working properly.
44	Most buggy app that I have ever seen. It's very very slow, most of the time it doesn't respond properly and doesn't show the important documents. Not able to connect with customer care also.
45	Bajaj Finserv is not at all customer friendly and is a fraudulent company. Investments made here are not safe. I would strongly advise against investing here. They have fraudulently withheld a large sum of my money which I paid for investment in a Fixed Deposit. Customer service is terrible as well! I've already raised complaints through the app as well as the helpline but no use.
46	With the new update since 25th Feb, I get notifications related to withdrawal every day and when I open the app on the service section it shows slow internet even though speed is 300 Mbps. No way to get past the slow internet screen to view service relations.
47	Bajaj Finance app is very useful and easy to use. The interface is simple, and I can easily check loan details, EMI information, and account services in one place. However most of the time it shows trouble in making payment from bank.
48	Facing 'technical error issue' in using KYC function soon after I started using this App a few days back. Unable to do E-KYC. Mobile phone handset is Samsung A36 5G. Crashing and hanging all the time since the first installation. Now not able to even login in the App.
49	Third class app experience — if you not manage or maintain app then why give that app. Your app never works. When the last update was downloaded it always shows slow internet connection even when connected to 100 Mbps connection with fiber optic cable WiFi. The problem is clearly in your app.
50	The worst app and support team. This has one of worst customer support I've ever seen. All I wanted was to pay my EMI on time to avoid negative remarks and they didn't bother to assist me while their application was running with full of glitches.
51	Extremely disappointing and frustrating experience with Bajaj Markets — I mistakenly ordered a 3.5mm jack earphone instead of a Type-C one and realized the error within just 5 minutes, immediately attempting to cancel the order, but shockingly there was no proper option to do so. Even after raising a grievance right away, there has been absolutely no response or resolution.
52	I recently received this card, but it is not supporting payments on Amazon or Flipkart. The option appears on Amazon during checkout, but when I try to make the payment it shows 'This payment method is not currently available for this purchase' every time. I feel the Rs 500 joining fee has been wasted.
53	I have been a customer for a long time and am totally frustrated. There is no option of contacting a customer care executive — everywhere in the calls and in the app they placed chatbots. I invested 45 minutes on the phone but was unable to find a way to reach a human. If a customer can't reach you, all trust sinks.
54	The app is easy to use and the EMI payment process is simple. However, bounce charges were applied even though sufficient balance was deposited in my account on the same day. Kindly review such cases and provide faster customer support.
55	Worst app ever used related to banking. To raise a complaint your app should work first. Almost all the places it shows some error with a Retry option. Retry also doesn't work sometimes. I was looking to see my personal loan details but failed to get the details after spending one hour.
56	Without giving any clear information, you keep deducting extra amounts in the name of penalty. Since there is no balance, we opted for EMI, but the extra charges are too much. Worst experience ever.
57	Worst app in my experience. Every time I try to apply for a personal loan it keeps telling me to login again and again and even the application status is not updated after weeks of applying. Totally disappointed.

#	Review
58	The worst app and service. Even after 20 days of continuous efforts, I couldn't do KYC. Then in frustration I requested them to erase the account, and got a response that it will take 48 hours, but 5 days have gone and they could not even erase the account. The worst thing is there is no human support for customer care.
59	Most buggy app ever. You can't even get past the homepage without a slow internet connection error and that too shows on important choices like viewing your insta EMI card and loan details. Bajaj should invest in optimising their app instead of spam calling customers for loan offers they don't want or need.
60	This is one of the worst apps I've used. Very laggy and unresponsive. Touch inputs don't work properly and take a long time to respond. The UI is also poor. I'm using a powerful OnePlus 9R, so I can only imagine how bad it must be on mid-range devices.
61	Most scammer app I have ever installed. There is no option to talk to customer support — every time it will connect me to a virtual assistant that literally does nothing. They overcharged me Rs 500 telling me the payment bounced, even though I have sufficient money for the loan.
62	They will not allow you to use Bajaj coins credited for purchasing prime and yesterday without any push notification or message they debited all my Bajaj coins. There is no convert to cash option provided. Moreover no customer support. Worse app. Waste of purchasing prime membership.
63	I am writing to share my experience with Bajaj Finance after completing my loan repayment. In case of EMI delay, I received frequent and repeated calls, which felt excessive and stressful. The behavior of the customer service representatives was also quite rude and unprofessional at times.
64	Absolutely ridiculous that I can't connect my bank with the phone number I've registered with Bajaj and the bank. The prompt just asks me to use the same number after receiving OTP. I ONLY HAVE ONE NUMBER FOR EVERYTHING.
65	The Bajaj Finserv app is a solid all-in-one financial hub that makes managing EMIs and tracking loan statements incredibly simple. The interface is intuitive and user-friendly, though the frequent promotional notifications and calls can feel a bit overwhelming at times.
66	After getting Rs 530 from my account the app started redirecting and closing again and again. Slowest app I have ever used. I wasted my 2GB data and mobile charge for a single purchase but till now I am not successful. I tried to buy through Flipkart but Flipkart didn't even recognise my Bajaj EMI card number.
67	Worst experience, worst interface, and very slow interface. Better fix those issues. The options keep on loading continuously and sometimes the app itself gets frozen.
68	The deadline is complete, there are only two dates left. If the time is even slightly overdue, it means a charge will be applied.
69	I called customer care and no one is answering my call. The loan has been approved and the call remained on the waiting list for 25 minutes but still no one answered the call.
70	This app is very slow. For example, if you want to update your profile you can't because that page can't show in your display. Worst app I ever used.
71	The Bajaj Finserv App is a useful all-in-one platform for loans, bill payments, UPI transactions, and investments. It offers many features like instant personal loans, EMI options, and easy bill payments, making it convenient for daily financial needs.
72	I had a very bad experience with this app. Despite having a sufficient balance in my account, I was charged Rs 500 extra for no reason. This is completely unacceptable. I have decided that I will never take any service or EMI from Bajaj Finserv again.
73	Worst app ever downloaded. EMI card page keeps on taking me back to reapply despite payment being made. No OTP is coming. Worst pathetic app. No customer support executive available to resolve the issue and chat bot is stuck in loop. Never ever download this app.

#	Review
74	Scam alert! Downloading the app asking for money — paid Rs 530 also but the app doesn't work for hours. The prices are double compared to Flipkart and Amazon. Waste of money, don't download it.
75	Worst app I have ever used. Not able to login at all. Every time it asks for fingerprint or PIN, even after trying for 5 minutes it keeps asking for the same without any error. No one can understand what's happening.
76	Don't go, it's a corporate game. Entering is easy, no exit. Its goal is to suck your money. No customer care. This app is designed only for getting a loan, afterwards no one saves you. If you want to exit, no OTP will come. It's purely designed for cheating innocent people. I can't even close this account.
77	The worst app ever. The UI is very glitchy. There is no proper customer service team — it's all a virtual assistant. They will never tell you important things, and when you enquire they say you should have assumed it. Please don't take loans from these guys. Your life will become hell.
78	The worst app — doesn't function at all. Everything keeps getting stuck, hanging, and unresponsive. It doesn't have half the features that are required and the ones available are unresponsive. Doesn't get updates in time. Customer support is not helpful either.
79	Excellent loan app! I had a great experience using the Bajaj Finserv Personal Loan app. The process was very quick and simple, and I got my loan approved within a short time. The app is easy to use and everything is completely digital, so no paperwork hassle.
80	Too slow interfaces — very bad experience. During the last day of EMI payments it's lagging too much, only buffering. Why is it happening? Because of your service lag, do I need to pay the penalty charges?
81	Worst app experience I've ever had in my entire life. Each and every section of this app takes a minimum of 4-5 seconds to just respond and whenever I try to do something important like KYC or update my email address it just casually shows there is an error. This is worse than many government websites and apps.
82	The worst finance company I've ever seen. They deduct multiple EMIs and then show that they haven't received it. They don't even have customer support where we can call directly and register a complaint.
83	Bajaj Finance has again deducted money from a bank account I never authorized for payments — this time Rs 588, and it's happened multiple times before. The app doesn't show a clear payment history and customer care gives no real help. Every call ends in vague responses and complaints are logged but the deductions continue.
84	Pretty handy app for managing finances! Easy to compare loans and cards, and checking my credit score was a breeze. Makes keeping track of everything way simpler. Definitely recommend giving it a try!
85	It's quite slow and often fails to open on time, particularly when it's needed the most even after installing an updated version. Every time it fails to either deposit or withdraw on time.
86	Very heavy app. Not working on slow internet. Also getting force stopped in Android Version 14 in Redmi K50i. I am unable to use it. I want to use Bajaj Pay and also want to purchase some electronics online but I am unable to use it on my phone due to these issues.
87	Not getting support. Even customer care number is not there to express our problem. I am having a problem with login — it displays 'suspicious activity detected'. Tried to connect customer support since 1 month to find out the actual problem but not getting support.
88	The application is not working at all. Whenever you try to open any service tile or information it gives a popup of slow internet with a reload option which is not right. This has been happening from the past 2 weeks — really irritating.
89	3rd class app. Always under maintenance. It can't connect with any bank server. So many glitches in the app. No proper customer support also.
90	When navigating to the 'service' tab, always showing a popup called 'Slow internet: Check your internet connection and try again' even though I have an excellent internet speed. It's been almost 10 days facing this same problem. Not even an easy way to reach customer care.

#	Review
91	It doesn't stay on the same page and continuously changes pages and shows technical issues. Also during the login process even with biometric enabled it is not allowing login with biometric — only PIN is required for the login process.
92	I have experienced the worst support with Bajaj Finserv. Already applied for EMI network card and when trying to view the details it will ask to apply again. If I try to apply again it shows that the card is already applied. To apply they charged an amount and the card details are not visible.
93	When I open the Bajaj app it doesn't work properly. It lags a lot and whatever I try to open inside the app doesn't respond correctly. The performance is very slow making it difficult to use.
94	Worst app — offer is good, but need to do lots of work on the app. Not working properly. Many times I try to check and want to pay advance EMI but app not working — showing something wrong every time. EMI card option not opened.
95	This app is so laggy and hard to navigate. There is just so much clutter everywhere. At times when navigating pages it becomes unresponsive for a considerable amount of time. UI could be improved significantly and it's hard to easily find what I am looking for.
96	Most useless app ever. When you need a loan they will keep rejecting your application or even if you get an offer it won't be less than 29.99% interest rate. This app is just a clickbait. I was getting spam calls from Bajaj Finance and now when I really need funds, Bajaj Finance does not respond to my loan application.
97	The Bajaj app is very useful and easy to use. The interface is simple and user-friendly, which makes it easy to check loan details, EMI status, and other services. The app runs smoothly most of the time, but sometimes it takes a little longer to load. I would recommend improving the speed and adding more clear notifications.
98	App is having some technical issues. I can't access my loan details for the past 5 days. It shows that my internet connection is slow even after I got connected with the WiFi.
99	I have been trying to pay my EMI on the app since a few days now and it keeps showing 'Feature under maintenance' while trying to make a payment. What is the use of this app if the main feature is down? This keeps happening every month and I'm unable to pay even when I can. This will affect your CIBIL score.
100	I had a terrible experience with the Bajaj Finance app. The app is extremely slow and full of technical glitches. Customer support is unresponsive and unhelpful. Hidden charges and unclear loan details make it very frustrating to use. I would not recommend this app to anyone.
101	It's the worst app ever, so laggy and unresponsive UI, app opening problems, payments fail 8 out of 10 times. I don't know how the Play Store rating is so high. It feels like the app developing team has somehow crammed Bajaj's website into an app.
102	A worst app for me. It has been 30-40 days since I downloaded it but till now I am unable to add my email ID. Every single time it shows a technical error at the end while I try to update my email ID. I tried to contact customer care but in vain. This app took a fee of Rs 530 and now it seems useless.
103	Frequent updates are required for login. While doing payment related activities through its wallets, it gets blocked and I'm unable to contact anyone. App now not working — really pathetic. All the money is on hold. Need to respond back from the team members urgently.
104	Too much lagging. The Pay EMI option below Menu is not working properly — taking a lot of time to open. Useless app and worst experience.
105	Worst app. Just unable to pay dues in-time due to frequent hangs. Multiple attempts to pay consumer loans failed. Eventually paid from bank directly. App hung again when trying to pay overdue fine multiple times over several days.
106	The EMI option still doesn't work, and this application is terribly slow to open. Many options won't open. When checking the EMI details, there appears to be no connection. Instead of placing lots of options on the screen, it would be better to make the software very simple so users can enter each section one by one.

#	Review
107	I applied for a loan of Rs 50,000 through the Bajaj Finance app. The loan was subsequently approved. I then completed the KYC process and uploaded my selfie. My bank account has also been successfully verified. However, the funds have not yet been credited to my account and I am unable to reach customer service.
108	Pretty good for keeping track of all my finances in one place! Easy to compare loans and cards, and the credit score feature is super handy. Makes managing everything way less of a headache.
109	I had a very bad experience with this app. The app is plagued by bugs, frequently crashes, and many of its features don't work properly. Customer support is extremely poor — no proper response, and resolving issues takes forever.
110	Worst customer service experience ever. I've raised multiple tickets for a simple issue, and they just close them without any resolution or explanation. Nobody reads the emails or addresses the actual problem.
111	Very poor service by Bajaj Finance. Customers are required to visit the branch every time just to check the top-up amount, which is highly inconvenient and outdated. This process wastes a lot of time. Request you to upgrade your system and improve customer service.
112	I'm using the new version but the same problem persists. I am getting a bundle of business calls but service calls are not received from the team. If asked for service-related help they didn't respond.
113	I have purchased Bajaj Kard through Flipkart. They mentioned they will call me in 48 hours for verification but they did not call. I was searching to connect with customer service but unable to contact because through this Bajaj app the bot is not doing any help. They took the money but did not provide any facilities yet.
114	Third grade app — most of the screens are not working, goes into opening forever. You cannot raise even a service request. You can try but not reach customer care. IVR is also useless with limited solutions only.
115	Amazing all-in-one app! From instant loans to seamless UPI everything works flawlessly. User interface is super clean and intuitive. FD and investment options are transparent and hassle-free. Customer support is prompt and helpful.
116	Poorly built app — can't find things, sometimes no option of going back. Documents don't show anything. Could not find details and the automated chat system is robotic and doesn't have options I am looking for.
117	Really horrible experience — 10 days ago I paid money by Bajaj wallet but that amount was not credited to the merchant. My order was not booked and I still haven't received my refund. Filed complaints many times and tried to contact customer care but nothing worked.
118	Debit card payment option does not work properly when paying credit card bills using debit card.
119	Worst app and so much slow and very disappointing policies by their management. A person cannot buy things every month as per your expectations. After 2 or 3 months suddenly KYC will be the problem.
120	The worst finance app I have ever used. They only try to find a way to overcharge you. I tried too many times to pay my EMI on the due date but it failed and after some hours they rewarded me with Rs 500 of penalty.
121	How can anyone make payment with this app when it stops working every few seconds with a message of technical error on our side? There is no working 'chat with us' window in it.
122	When you go to your profile and click on personal information it comes up with a blank screen. Try to chat — blank screen. Do you guys not see these faults yourself and feel like making it work?
123	I am using it for the first time and I loved the wide range of products and services offered by Bajaj. Just loved the easy interface of the app to explore.
124	Currently I'm facing lots of issues — I have EMI on mobile and the application is too slow and doesn't load. It takes lots of time to open a single page. App contains lots of things in one — please declutter it or make the app faster.
125	Nothing works on the app. Too many bloats, pictures and animations — laggy and buggy. Couldn't download any documents showing errors.

#	Review
126	Good experience with Bajaj Finserv. The loan process was fast and hassle-free, and their digital services are easy to use. Overall, a convenient option for quick financial needs.
127	I ever seen such the worst app — not able to connect with required data. For login every time we need to uninstall the app and do the login.
128	Very poor customer care. I applied for a loan and an executive called and asked all my details. He told KYC will be done in 15-16 minutes but no call came till today. Then I tried to contact another executive who said he is busy and will call later.
129	Don't use this app. Sending fake cashback offers via notification for which you never get anything and there is no proper channel to reach customer support. You will lose your money.
130	Worst app ever. Got 100 icons in it and none function well. It'll keep loading forever and ever. Work on your tech!
131	Recently, I haven't been using this app because there are many ads and unnecessary banners. It feels like a waste of time as it takes too long to get the information I need.
132	Extremely terrible app with extremely bad service. They violate laws by harassing customers and using abusive language through their representatives. Please don't go for this NBFC.
133	Worst application. Card number always masked and shows every time authentication unsuccessful. Maximum time the application hanged or too much slow.
134	Worst application — 99.99% of the application is not working. A completely white screen is coming every time. On time I can't even pay because of this application on holidays.
135	Over the period of time, seeing a blank white page after clicking any button on the home page. So I had to clear cache and all data in settings and re-login to use the features. Also the app feels heavy with delayed response and lagging transition from page to page.
136	The app is very unreliable. It crashes frequently and doesn't work when needed the most. I can't see my relation or my card details.
137	It's working very slow and not showing EMI details — only buffering. After the update it's in slow motion even on a 5G network and not showing EMI details.
138	This app stops when I open it and click on any option. It doesn't open even after clicking on a single option.
139	Very bad Bajaj Finserv — I didn't expect the over due charges you apply randomly. Also you deduct the payment over time, and there is no customer care number for resolution.
140	Your app needs to be updated properly. Every time it shows an error while login or says the internet is not working. Not a good experience while using the app.
141	Very pathetic. Dashboard load takes time and whenever I'm in need of accessing my flexi loan it shamelessly says slow internet connection. Please take this as high priority and fix it. Also make sure your app works on slow internet connections as well.
142	This is the very worst app. Calculations are wrong. How can you make this product live without proper testing? I've paid an advance amount for the loan but it's not credited to my loan account. For 2 months I need to pay additional money. I want my money back.
143	It has a very slow interface and needs some improvement. There are major bugs. It feels slow even with a full network. Please fix it.
144	Bajaj Finance app is fast, user-friendly, and very reliable. Loan process is smooth and instant. Overall hassle-free and convenient experience.

#	Review
145	App keeps giving one or another trouble. Web version is good. Current problem: when I go to my account, it shows slow connection and does not allow me to get into it no matter what internet connection I use.
146	One of the worst apps and it's completely non-functional. I took the insta EMI card but after all the things I can't see the information of the card. I have tried all the things and there is no way to get to customer support. Just pathetic experience.
147	Whenever I open this application, I get a white screen and nothing happens. Even after leaving it for two hours, the white screen keeps coming. This has been happening for two or three months. I have deleted it and tried it.
148	I have applied for a loan multiple times and it always shows under review but I never get a status update neither on the application or my email or phone number. If the application is rejected or approved there is no way to contact customer support.
149	It's full of mess with so many various useless services which don't have dedicated customer support. It is not made for convenience — it's made to disguise you with lots of spam and offers. I found myself trapped in the lure of offers which are actually fake.
150	App has lots of room for improvement. I didn't like this app. This company gives solid offers like cashbacks but they are not honest and straightforward.
151	The application is not working properly and the EMI option is not showing. Because of this I am unable to proceed further.
152	I am facing a very strange problem every time I open the make payment section — it shows a reload option and when I click reload it shows the same reload again. This problem has been happening for 5 to 6 days repeatedly.
153	Zero customer support in this app. Only bot will reply. Throughout the week I tried to convey my issue but it was not able to understand my problem because it's a nonsense bot. You will not get a call from customer support.
154	There is no option in 'raise a request' — just a few options for personal loan, vehicle loan and product loan. My issue is not mentioned. I never applied for any loan and I got a message in the Bajaj Finserv app that my loan is cancelled. There is no customer service. Please provide an email address.
155	UX is too cluttered. App is very messy and randomly throws errors. Sometimes though having very good internet, the app says low internet detected. App should be clean and simple.
156	Worst support and not able to close account. Not able to talk to the customer care. IVR options also not able to meet customer needs. Chat bots are not understanding our concerns. No human support team. I want to close the account.
157	Yesterday I applied for a Rs 40,000 personal loan through the Bajaj Finance app as it showed a pre-approved offer. I completed the full process and received a call from an executive for document verification. Later I got a message that my KYC was successful. However, I still have not received any confirmation whether my loan is approved or rejected.
158	Excellent app with a very user-friendly interface. Managing my EMI and loan details has never been easier. Highly recommended! A comprehensive app that covers everything from UPI to investments.
159	The most worst app I used. When I open their app to raise a complaint or request a service it is not opened, but we play their promotional content it will play. I tried more than 50 times to approach them but no use. Only AI can talk with us and that's no use at all.
160	Kindly don't take their EMI card. They don't have voice assistant service. When you have a query after paying for the EMI card, every time an AI will talk to you. For help you have to take a leave and visit their office. The offline service also tells that if you want to use Bajaj EMI card you have to shop for more than Rs 5000 otherwise they don't accept the card.
161	This app sucks. Whenever I tried to open the EMI options it's always saying 'You don't have internet' even though I have full strength WiFi connection and I have the latest update of the app.

#	Review
162	This finance app never opens. Always staying in the same place. Anything you like to see in it has never been open to you and is never useful.
163	Horrible experience — waste of time and data. I was bombarded with continuous calls from their team pushing me to take a loan. Once I finally agreed and spent hours submitting every single document they requested, after a long tedious verification process, they rejected the application with pathetic excuses.
164	Totally a waste of time. When you open it's stuck on network even with high speed internet. App still loading and lots of time shows error. When you open it always shows 'applying for loan'.
165	Trying to open app but it's not going beyond biometric login. After login it's just completely white screen. Tried basic things like app update and clearing of cache but not working. The same issue for the last many days.
166	Very bad experience — I am not able to do part payment of my OD limit from last 3 days. Because of their app fault I am being charged interest.
167	Too many glitches, freezing problem, does not work smoothly. Too much buggy.
168	Trying it after a year. The app still has a lot of popups, but gives up to Rs 100 rewards per month even without prime membership.
169	I am extremely frustrated with the service. I have been trying to access my EMI card details but the app is stuck in a constant buffering loop — waste service.
170	Pathetic application — there are lots of bugs in the app like email ID not updating, welcome letter not downloading, and even after completing KYC the app shows it's pending.
171	The Bajaj Finserv app is fast, secure, and easy to use for financial services. It helps users manage loans, EMI payments, and investments in one place. The app has a simple interface and quick transaction process.
172	I applied for Flipkart insta EMI Bajaj card and completed KYC as per instructions but till now the card is not accepted on online transactions. It always fails when I do transactions on Flipkart.
173	Extremely user-friendly interface. Managing my EMI payments and viewing my loan statements has never been easier. The instant approval process for new loans is fantastic.
174	The app is praised for its smooth loan process, quick approvals, and user-friendly interface. Customer support is helpful for many, though some report issues reaching them.
175	Worst app — non user friendly, taking so much time to get open. Sometimes getting an hour to get open. Unusual things in the app. EMI transaction was not showing in the app.
176	Scam app. You can withdraw money, but you will never be able to make part payment. I am trying to do part payment for the last three days. I am not able to do it. But on the other hand you can comfortably withdraw money. This is not fair.
177	Always throws an error of low internet connectivity, however I am able to use all other apps including other banking apps very smoothly.
178	App not working — whatever you open, it says your internet connection is slow. Also biometric not working for login, using MPIN for login. Horrible update.
179	Such a disappointing app to use Bajaj EMI card. Sometimes I can use it on Amazon and Flipkart and sometimes I don't. When I want to contact customer care there is a virtual assistant which is nonsense. App shows slower network speed even in 5G network.
180	Worst than worst — I am trying to open my loan details with 5G and WiFi internet connections since last month but every time a notification pops up saying slow internet and not showing loan details.

#	Review
181	I have been trying to make a payment since this morning but whenever I am trying to enter the accounts menu it's showing the internet is slow.
182	Don't fall into their trap — total fraud system. I have provided everything but name mismatched issue not resolved in last 6 months. Pathetic service.
183	Worst app — trying to view my insta EMI card number but either the screen goes blank or it says 'authentication unsuccessful' without asking any credentials. Frustrated from trying it from 4 days.
184	They continuously called me to buy their product. Once I agreed, they said it will not close without paying extra money for force closure. At time of buying their representative made all the commitments but now they say you need to pay money for that. Pathetic service.
185	Please keep a proper, accessible number available for communication. Despite the numbers provided, one is unable to connect with customer care when the need to speak actually arises.
186	I like how easily Google Play Store rating can be manipulated nowadays. Bajaj is doing everything to make their Play Store rating higher rather than focusing on actually improving their app.
187	Very bad service — loan process promised floating interest but given fixed rate of 17%. Also I want to force close the loan and they are asking for installment amount multiplied by remaining tenure months. Very very high amount — this is not fair.
188	Your application is not working properly. When you open the first page it shows the loan account but when you try to do anything on it — whether depositing EMI or withdrawing the amount — it shows 'You do not have any active relations.' The customer care number also doesn't provide a proper response.
189	Worst app ever. Please don't take loans from Bajaj. They take high interest rate. They don't have a proper system for deduction of money. If you fail to pay in working hours they bounce charges on you, although the deadline is not over.
190	Its UI is worst, very worst and unstable. It took very much time to load and process even for OTP verification.
191	The Bajaj Finance app is very slow and often takes too much time to load. The performance is disappointing, especially when trying to check account details or make payments quickly.
192	I cannot see my card detail. Every time I click it goes to apply for card, then it will show that the card is active but I can't see the details.
193	I am trying to login since last week but it failed without reason. Most of the time it shows internet connection is slow whereas I am connected to WiFi with good speed. Very heavy app — it gets hung most of the time.
194	I am a customer of this finance from last 4 years and I paid each and every EMI on time — not a single bounce. Still they are not increasing the limit.
195	This app is very bad. They blocked my EMI card without any reason, and when I ask for the reason they themselves don't know. And when I try to contact customer service, they have only an AI bot.
196	I had tried to reset my MPIN which I forgot but it's too difficult. There is no option to change it. PAN verification done and message came that query is closed but it's still open. I have not changed my MPIN — there is no option to open the app.
197	The Bajaj Finance app is very laggy and slow. Many times pages take a long time to load, which makes it frustrating to use. It feels like the app performance is not optimized properly.
198	This is a completely useless service. I cancelled the CPP plan but the money is still being deducted from my account. The customer care numbers are also useless because they are not helping people at all.
199	App closes suddenly. When opening the app it shows up for just 2-3 seconds then closes automatically. Worst service — I can't even check my loan payments and other details.

#	Review
200	Worst app I have ever seen — you are saying instant loan but I applied 10 days before and still your team is verifying. What is your team doing in verification? A man pays higher interest because he wants an instant loan but this app makes a joke of it.
201	I want to do part payment for my loan. I have a 300 Mbps internet connection but still the application is not able to open the loan section and every time it says to check internet connection. This has been happening from the last 2 months.
202	Very poor — it is saying slow network even with 100 Mbps internet speed. Many times not able to see the loan details. Bajaj really needs to work on this ASAP. This is hampering your business.
203	Bajaj Finance/Finserv is generally praised for its fast loan approvals, high loan amounts, and flexible repayment options. Customers benefit from easy, often instant, digital lending processes via their app.
204	It is forcing me to uninstall the remote desktop app. Not even an option to accept the risk and continue. An IT professional like me cannot just uninstall such apps.
205	Showing slow internet connection but recharge can be done and the load page is opening. But few pages are not opening since few days. I'm unable to see my EMI details.
206	Great experience! My EMI issue was resolved promptly and the refund was processed without any hassle. I appreciate the quick support from the team.
207	Getting irritated with this app. Whenever I try to open the app it will buffer and throws a popup as 'please try again'. This happens 9 out of 10 times. All other banking apps are working fine except this Bajaj Finserv app.
208	Having problems while opening the app and not showing anything after the update. Lots of problems to check the status of EMI. I am not satisfied while using the app.
209	Serious bugs issue and a lagging problem. When I open the app every time a white screen appears, then I clear cache and then the app opens. How many times do I need to clear cache to enter the app?
210	Most dangerous app ever I used. You don't even know the charges and services they provide. After paying advance EMI also it will show your EMI is bounced without giving any proper explanation. Customer support is next level useless.
211	This app is very slow and doesn't work effectively. When I open it to check my EMI I am unable to check because of internet issues. Other apps are working great but this is not.
212	Customer support: I had a small query regarding my repayment schedule and the support team resolved it quickly. The IVR is available in multiple languages which made the process much smoother.
213	There is no call center team to answer and revert queries, nor any options to select in call center. If solving customer issues is not your company priority, better close the company.
214	Loans and EMI Network Card: Highly regarded for fast, digital and pre-approved personal loans. However, some customers report discrepancies in promised interest rates and poor post-disbursement service.
215	Worst app — this app does not even work properly. Every time this app shows slow internet connection. You guys should develop a good app or else you shouldn't build one like this. This has so many bugs.
216	Fast personal loan disbursal — the Bajaj Finserv app is an excellent all-in-one platform. Its user-friendly interface makes managing instant loans, No Cost EMIs, and bill payments seamless. It's highly efficient for tracking finances and credit scores!
217	Whenever there is a reward, the page gets stuck always. By no means will it remain the same till I do something out of the box. I request the team to either not come with any reward or cashback or fix the page issue.

Bajaj Finserv

Privacy Policy & Terms and Conditions

Company: Bajaj Finance Limited (BFL)

Website: bajajfinserv.in/privacy-policy & bajajfinserv.in/terms-and-conditions

Last Updated / Sourced: April 2026 (Sourced from official Bajaj Finserv policies)

This document compiles the key privacy policy provisions and terms & conditions as publicly available from the official platform. It is intended for informational purposes. Always refer to the official website for the most current version.

PART I — PRIVACY POLICY

Overview & Applicability

This Privacy Policy is published by Bajaj Finance Limited (BFL), a Non-Banking Finance Company (NBFC) and Prepaid Payment Instrument Issuer. The policy applies to all Users who visit or use the Bajaj Finserv website, mobile application, and any other electronic application, as well as those who visit BFL branches or authorised dealer stores. The Bajaj Group includes Bajaj Finance Limited, Bajaj Finserv Limited, Bajaj Housing Finance Limited, Bajaj Allianz Life Insurance Ltd., Bajaj Allianz General Insurance Ltd., Bajaj Finserv Direct Limited, Bajaj Finserv Asset Management Company Ltd., and Bajaj Finserv Health Ltd. By using the platform, users consent to this Privacy Policy.

Information Collected & Device Permissions

BFL collects personal information including contact details (name, phone, email), financial information (bank account, credit/debit card details, PAN, Aadhaar), and other KYC information. The Bajaj Finserv mobile application may require certain device-level permissions to provide functionalities in accordance with prevailing law. Customer contact details accessed via device permissions are used only for specified purposes; BFL does not store them for any other purpose. Users can manage permissions directly via device settings.

Cookies & Session Data

Cookies are small data files stored on your device. Personal information such as name and account number is NOT stored in cookies. BFL may temporarily store your mobile number in cookies for a session; it is deleted simultaneously upon session end. Cookies are used for session management, platform personalisation, and security purposes.

Purpose of Data Use

BFL uses your personal information to: provide and improve financial products and services (loans, deposits, insurance, Bajaj Pay Wallet, UPI, bill payments, wealth management); communicate updates, offers, and notices via phone, SMS, email, WhatsApp, or in-person; verify identity and conduct KYC; carry credit checks and due diligence; undertake regulatory and financial reporting; manage risk models; conduct audits; and fulfil requirements of applicable laws and regulatory directives.

Data Sharing

BFL may share your personal data with: affiliated Bajaj Group companies; third-party service providers and partners under contractual obligations; regulatory and government authorities as required by law; credit bureaus and financial institutions; and third parties partnered with BFL for co-branded products or services. Users are authorised to be contacted by BFL, its group companies, affiliates, and partners.

Data Erasure & User Rights

Users can request erasure of app data via: Menu > Help & Support > New Request > Others > Delete Bajaj Finserv App Account. For personal data erasure from Bajaj Finance Limited's ecosystem: Service > Your Account > Manage Account and Data > Right to Erase > Erase your data. Erasure requests are evaluated for compliance with regulatory and statutory retention requirements. BFL may reject erasure requests if legal proceedings are ongoing against the user.

Security

BFL implements high standards of security to protect user data. The platform complies with the Digital Personal Data Protection Act, 2023, the Information Technology Act, 2000, the IT (Reasonable Security Practices) Rules, 2011, and applicable RBI and SEBI regulations. BFL employs encryption, access controls, and regular security assessments.

Governing Law

This Privacy Policy is governed by the laws of India. All disputes related to this policy are subject to the exclusive jurisdiction of competent courts in Pune, Maharashtra. The policy may be updated from time to time; users are encouraged to review it periodically.

PART II — TERMS & CONDITIONS

Introduction & Consent

By accessing, browsing, or otherwise using the Bajaj Finserv App and/or Bajaj Finserv Services provided by Bajaj Finance Limited (BFL), you agree and explicitly consent to all terms and conditions under the Terms of Use and the Privacy Terms. Acceptance is confirmed through OTP sent to your registered mobile number and/or email, or such other mode of authentication as may be prescribed by BFL. 'We', 'Us', or 'Our' refers to Bajaj Finance Limited. 'You', 'Your', 'Customer', or 'User' refers to the individual using the Bajaj Finserv App.

Eligibility & User Obligations

You must be an Indian resident with the legal capacity to enter into a binding contract under Indian law. By using the platform, you represent that you are at least 18 years old and legally eligible to avail BFL's financial products and services. You are responsible for maintaining the confidentiality of your login credentials and OTPs.

Authorized Communications

You hereby agree, consent, and expressly authorise BFL, its representatives, agents, group companies, and affiliates to send communications and notices regarding loans, insurance, and other products through telephone calls, SMSes, emails, notifications, post, bitly, WhatsApp, bots, and in-person communication. These communications may include onboarding updates, product offers, and regulatory notices.

Fees & Charges

You are responsible for paying all fees and charges applicable to transactions executed through the Bajaj Finserv App or for use of Bajaj Finserv Services. BFL has full discretion to determine the nature and quantum of applicable fees. Changes in fees will be notified in accordance with the terms of the respective product or service and shall be binding upon you. Current charges can be viewed at bajajfinserv.in/all-fees-and-charges.

Reward Schemes

You may be eligible for BFL Reward Schemes, including cashback, BFL Reward Points, promotional points, and vouchers, upon completing eligible transactions. BFL may change, amend, or discontinue reward criteria, eligibility, and benefits at its sole discretion. Each reward scheme has its own time-bound validity.

Prohibited Activities

You must not use the Bajaj Finserv Platform for illegal purposes, fraudulent activities, or in a manner that violates applicable Indian laws and regulations. You must not attempt to circumvent the platform's security features or access any data or systems in an unauthorized manner.

Limitation of Liability & Disclaimer

BFL and the Bajaj Group shall not be liable for any direct, indirect, punitive, incidental, special, or consequential damages (including lost revenues, loss of business, or loss of data) connected with the use or performance of the Website or Bajaj Finserv App. All materials on the website are provided on an 'as is, where is' basis without warranty of any kind. Users should seek professional advice before acting on information from the platform.

Governing Law & Jurisdiction

All transactions and the entire relationship between you and BFL are governed by the laws of India. All claims and disputes shall be subject to the exclusive jurisdiction of competent courts in Pune, Maharashtra. BFL reserves the right to modify these Terms at any time; changes shall be notified as per applicable requirements.

Third-Party Liability

BFL acts as a corporate agent and distributor for third-party insurance and financial products. All product information (premium, benefits, exclusions) is sourced from the respective insurance company or assistance provider. BFL cannot be held liable for any direct or indirect loss arising from reliance on third-party product information. Customers are advised to read all product documents carefully before purchase.
