

PhonePe - User Reviews (Google Play Store)

Total Reviews: 177 | Source: Google Play Store | Generated: April 2026

	Reviewer	Review
1	Balasubramanian	I know I'm not the first person to give this feedback but the new UI is a disaster. Using the app without the dark mode is the most unpleasant experience. The previous version itself was amazing and we all got used to it very well. As a user I don't see a need for a new UI. You have tried to fix something that was not broken. Please bring back the old UI.
2	jagadesh kumar	I am not satisfied with the support provided. It is very difficult to reach a real person, as all interactions are handled by bots with no option to speak directly to a representative. I applied for the Wish Card, but the application shows a name mismatch issue and cannot be canceled. It has been more than a week, and the issue is still unresolved.
3	adarsh bandaru	My PhonePe account has been marked as risky, and because of this, others are unable to send me money. When they try to pay through PhonePe, it shows that my number is fraudulent. I have not received any clear explanation about why this is happening. I request the team to please review my account and resolve this issue as soon as possible.
4	Rajesh Kumar jha	This is a completely useless app. I missed my exam today just because I did not carry change money and was dependent on it. At the last moment PhonePe did not allow me to make payment to the merchant nor add money to UPI Lite. The reason was their so called PhonePe protection. Even after having 3 accounts, I could not make payment from even one.
5	M Sharma	Very disappointing experience with PhonePe. The app works fine until there is a problem. Once you get stuck, there is no proper way to speak to customer support. The available options are limited and unhelpful. I received no proper resolution. Out of frustration, I had to use the balance for mobile recharge just to clear the funds. Very pathetic experience.
6	Teja sri Edla	It is the best app to use in public. There is no need to carry the cash for our daily needs. We can transfer the money easily without the person knowing. The best part in this app is to provide the password and keeping it secure. If you are a business person you can easily earn the cash via the app.
7	Ashok A	I have taken a loan from PhonePe. The loan foreclose button has not worked for more than 15 days. I have raised a query and generated tickets but still not getting any help from support. The support executive gives just the next date about the solution and no update on the given date. Ticket no: #2464948. I also mailed on their all support mail IDs.
8	Sanju bhai gaming	My account has been blocked and I have been unable to access or use it. I have contacted support many times, but no reply from customer care and no reason given for why my account was blocked. Worst customer service. Send mail - no reply. Called customer care - not telling anything. Do not install this app. Worst app.
9	ISHRATH HUMERA	The most horrible app. It cuts the payments and money automatically and does not keep proper history. Today I paid Netflix my monthly amount and it did not clear the payment. PhonePe showed me that the amount was paid and the transaction was successful. Now Netflix said it was declined and moreover my amount from the account was already deducted. PhonePe is a fraud. I need a refund ASAP.
10	BHOLA KUMAR	PhonePe has truly revolutionized the way I handle daily transactions, making it an absolute must-have app on my smartphone. Whether I am paying for groceries, splitting a bill with friends, or recharging my mobile, the process is incredibly seamless and lightning-fast. The user interface is clean, intuitive, and easy to navigate.
11	sukdev pandit	During entering the amount of payment, there should be a line of amount to be written in words and if amount more than Rs 999, then a confirmation popup should appear. Otherwise sometimes an extra number gets added by mistake and it makes a lot of trouble. In the app, the option for writing my views has disappeared. It is pathetic.
12	Ranjit Kumar Sahoo	All of my accounts are not showing in this app from 22/03/2026. I cannot see balance and cannot pay anyone. I cannot set any other bank to primary account. Even not able to connect to their customer care - it is a bot on their customer care number. Please fix my problem otherwise I will never use your app in future. Now I am uninstalling it.
13	B A D S H A	PhonePe Wallet is one of the best - it allows easy and secure payment transfers without deducting even a single rupee. One of the most useful features is that it provides a UPI ID for the wallet. Small request: please consider providing a wallet QR code along with the wallet ID to make receiving payments even easier. Also consider linking the wallet with DBT.
14	Rudhish kumar Dakua	Why is it so difficult to reach a customer executive. I have tried so many times but still I am not able to get connected with them. My EMI for autopay was cancelled by the app but I am not able to delete the autopay. There is no solution. More shocking - it is showing my query was resolved, which is not true.
15	noothaneswari gorle	Everything is okay. I want to suggest an add-on. It would be better if we can get the sum of credit and debit for each phone number or bank account we are sending to or receiving from. This helps for analysing how much we have paid to or received from a particular person. We can add date, month, year filters too.
16	Tripti Sharma	Just do not use this app for your transactions. I took ChatGPT Go subscription by PhonePe and then I wanted to delete the subscription. I did so but still there is autopay after my subscription deletion. Then I again took the subscription and now there are two subscriptions of the same ChatGPT account with autopay and there is no way to delete them. Even support just asked to generate a token and no other steps were taken.

	Reviewer	Review
17	Rajan Acharya	Totally untrusted. Money sticking daily. When I raised to PhonePe support I can only tick few lines and cannot mention what the main issue is. PhonePe says payment is successful but merchant says they did not receive it. If I try something again PhonePe does not allow. It is a kind of fraud.
18	ankit kumar	It has been more than 11 days since my application was updated. I had my money on UPI Lite but now it is not showing. From the past 11 days it shows as technical issue. I logged out and logged back in to check for the option but did not find it. I followed up by creating a ticket but they are so careless and not taking it seriously. I am not able to use my money.
19	mr g	App is fully user friendly and easy for any online transaction. Can you add a feature like Expense report of my transactions - monthly total expenses, transactions above a custom amount, UPI name wise all transactions etc? That will help us to know our monthly expenses and help in budgeting.
20	GOVIND	These old platforms, sometimes the payment fails. There is no benefit on transactions or bills, and for any transaction it is taking platform fees instead. Discounts and benefits are available in other apps. Forget about cashback here.
21	pawan Sharma	Warning for Users. I want to share my personal experience with buying gold and silver on PhonePe. Whenever you buy digital gold or silver on this platform, GST and other charges are applied. When you sell it, charges are deducted again. Because of these deductions, even if the market price increases, you may still receive less money than what you originally invested.
22	Dr M	Customer service number has only IVR for select options. I could not transfer my money to my account. Tried to find the solution for hours but no use. No person to take the call and resolve. Worst experience. Thinking of using other apps.
23	Sagaran Jos	The best UPI app ever. And with the credit card bill payment feature it becomes even more handy. Edit: PhonePe has been hogging battery - more than 20% on a daily basis. The app has a couple of minutes of screen time but shows active usage of 20%.
24	Amit kumar Dash	Very frustrating experience with PhonePe. On 11 March I tried to book a train ticket but the amount got stuck due to an auto-debit activation issue. I checked with IRCTC and PNB Bank and both confirmed the money is not with them and asked me to contact PhonePe. For the last 4 days support keeps calling but gives no resolution. My money is still stuck.
25	Devyani Shrotriya	Random glitches happening all the time. Whenever I try to open the app and go to check balance, it does not let me and instead takes me to the starting interface. Even if I somehow reach it the screen goes blank. There used to be a payment done page but now it does not come anymore. Screen just gets frozen. This is still happening after clearing cache files, app data, and reinstalling multiple times.
26	Buddhist Monk	I request PhonePe to include details about where we spent our money when we request a statement. For example in the Remarks section, we write payment made at such a place or for buying something. That should also be included in the statement remarks option. Otherwise everything is okay.
27	Manoj Manu	Always stuck. Only pending or processing every time. Contacted support but it is AI generated - not 2 way communication. For an application used by more than half of India's population, you cannot have a proper help center or 2 way communication? You are using a bot to solve customer problems.
28	Shrikumar Sarade	This app allows your bank linked mobile number when you deposit amount in wallet and does not ask anything. But when you withdraw the amount from the wallet, it asks for KYC. If your mobile number linked to your bank account is not linked to PAN, the app rejects the withdrawal transaction. I hate this app policy.
29	Krishna Kumar	I purchased a JioMart e-gift card worth Rs.564 on the PhonePe app because it showed a flat 2.25% cashback. There was no mention in the terms and conditions that this offer had expired. After not receiving cashback for several days, I contacted customer support and was told that the offer had ended in 2025. If the offer was expired, why was the cashback still visible on the app?
30	Sourabh Shrimali	Help! I am your user since 2017 but when I updated the application after 2nd January 2026, all my previous transaction history from 2025, 2024 and so on is not appearing. I have tried all your possible communication options to raise this concern but none of the options has any appropriate action to proceed further. I also tried all possible combinations of date filters but none of them worked.
31	ANIMESH DAS	It is a very useless app. Zero support from customer service. If a transaction fails they will not pick up your call, whatever you do, they will not pick up your call. Very disappointed from PhonePe.
32	Hafizul Islam Mondal	I have been using PhonePe for a long time and it is one of the best UPI apps in India. The app is smooth, fast, and very reliable for daily payments and money transfers. I am really happy with the overall experience. However, recently ads are appearing more frequently inside the app. I kindly request the team to reduce ads.
33	Meera Devi	This app is pretty good and provides smooth payment without any lag. The most interesting thing in this app is that your account becomes more secure with the new update. But please add at least 2 account holding option in this app because we use 2 accounts and this app only holds 1. If you want to use another one you have to delete the first one. Fix this problem.

	Reviewer	Review
34	Bhargav Nirmal	Finally today I uninstalled PhonePe after receiving too much pathetic customer support. Agent told me to hold while checking details - more than 14 minutes wait but no response was given, and after that he ended the call. I think PhonePe should terminate this type of employees who do not want to work and provide opportunities to those who do.
35	AV Creation	PhonePe is a widely used, high-rated Indian UPI app noted for its fast transactions, reliable UI, and extensive utility features like bill payments. While generally trusted, common user complaints involve slow customer support, failed transactions resulting in pending refunds, and an overwhelming volume of advertisements and promotional notifications.
36	rahil wani	It has been 4 months now I am unable to link my bank account with PhonePe as it is showing account not found. There is no way to contact PhonePe customer care and whenever I call the number there is no option to contact a customer care executive. This app has now become a headache for me. Your service is totally frustrating.
37	bharath boppana	The relevant details to my issue are not in the PhonePe Help section and the number provided to contact customer support does not give options to raise a ticket on my issue - which is unable to receive payments on PhonePe. I mentioned it clearly in my previous post, still you are giving the same way to report my issue which is not working. I have been facing this from the past 3 months.
38	Suhail Dar	Whenever I need to make any transaction, I have to install this app again and again because when I open it the interface gets stuck and the mobile seems to be hanging while all other apps are working properly. Please suggest what should I do as installing it again and again consumes a lot of time.
39	G S14	Old transactions disappeared from PhonePe, and I am not able to receive a statement of my transactions. I have tried more than four times - every week it says I will get the information in my email within 24 hours, but it never arrives. Please help me.
40	Ak Nayak	I am giving this app 2 stars because of the excessive platform fees. Charging a Rs.4 platform fee per recharge is simply too much for normal people to pay just to keep their phones active. It defeats the purpose of quick and easy digital payments. Please reduce the platform fee.
41	Sunny Kumar	PhonePe is an extremely powerful and reliable payment app. Whether it is a UPI payment, a mobile recharge, an electricity bill, or sending money - it is all done in seconds. The app interface is very simple.
42	Kalpanath Mohanta	Worst service providers. Cannot easily contact customer service personnel for resolving any problem. There is no option to directly talk with customer service personnel and even problems are not listed in the chat bot. Worst and worst service only. PhonePe earns money by fooling users and does not want to provide any platform to resolve the problem easily.
43	Amol Mishra	Despite being on a 300mbps broadband WiFi, the check balance page in PhonePe app takes almost 15 seconds to load as that page is cluttered with too many ads. The product manager who screwed the app to this extent to accommodate ads is doing a terrible job. Uninstalling PhonePe. Was an avid user since 2016.
44	Sravanthi Challa	I recently started investing in Gold SIP through auto-pay on PhonePe. I recently noticed a delay in the transaction history updates. When the SIP amount is deducted on a particular day, it does not appear in the same day's transaction history. Instead, the transaction reflects only the following day. This raises concerns regarding transparency and reliability.
45	Durga Parsad	The app is overall good but there is one thing that is most irritating. We are unable to take a screenshot of the current balance. Neither the remaining balance nor the current balance is available on the history or statement of account. Please fix this.
46	Meithuanlung Pamei	User experience and all transactions are smooth. I love this app. But I bought gold for Rs.2500 and they deducted GST Rs.70 and I received Rs.2430. OK, that I understand. But after that my gold price increased by Rs.50 to become Rs.2480. When I tried to sell, the gold amount was showing only Rs.2400. It is a waste buying gold here.
47	Vandana Srivastavo	I have been using this app for so long and never saw any problems until now. I booked a ticket and the payment was done but booking showed pending. I tried to login with my IRCTC id but it just showed invalid. Absolutely horrible and frustrating. I had an urgent function to attend the next day. After 2 hours and 12 failed booking attempts I went to customer support and the AI glitched so badly.
48	Sunil Vc	Worst service I have seen until now. I withdrew Rs.10000 amount by UPI scanner method and amount was debited to me but I did not receive any amount from ATM. Disgusting banking facilities and PhonePe. If we customers raise a ticket you tell us to ask your bank. This is absolutely not acceptable.
49	Mayank Raj	EDIT - More scammy behaviours, immediate popups to apply for credit card, loans etc. This is getting worse day by day. The app begins showing manipulative behaviors to squeeze more from you, such as prompting you to set it as default by hiding behind lengthy regulation-styled messages that mimic official notices.
50	Chaitanya Jathar	App performance has degraded lately. Not only is the app lagging considerably, but it keeps crashing. The app undergoes a frequent setup process, which should happen only while setting up and using the app for the first time.
51	TMR Vivek	Very cluttered UI, not pleasing to the eyes. Simple and large icons would be better. Ads are everywhere which are super annoying. History section should be clean but there is also an ad on top. After payment screen should be clean and transaction amount should be large and clutter free so it is easy to show to merchants.

	Reviewer	Review
52	Vipin Gupta	Worst app with no support. Customer care reps are just there to fool clients. Never use this app. There are lots of other apps available for online payments. I would suggest going with other apps instead of getting befooled by them.
53	Chhinmyee Bhoi	PhonePe is one of the most popular digital payment applications in India. It has made online transactions simple, fast, and convenient for millions of users. The app is widely used for sending and receiving money, paying bills, recharging mobile phones, booking tickets, and many other financial services.
54	Sarmela Pandit	Hey PhonePe team, I am really frustrated with the app right now. I am getting an error when I try to check my balance and cannot make payments. Also, UPI Lite is not closing. My transactions are stuck and I am getting stressed. From 30 days I am facing technical issue regarding payment and UPI Lite even though I cannot even check balance.
55	Real_Maksud	Scratch card was received, but it is not getting scratched and no reward was credited. The biggest problem is that there is no proper customer support or live chat option in the app for reward-related issues. I tried a lot but there is no way to contact support for this problem. This is very disappointing. If issues like this are not resolved, how can users trust this app?
56	Bharath M	Time to uninstall this useless app. If you are recharging, use some other app - never use this one. They charged me Rs.22 extra for a DTH recharge with no transparency. They hid all the charge breakdowns and showed only the total amount. This feels like cheating by not clearly showing the convenience fee.
57	Prithviraj Harshasiddhu	I have had a truly terrible experience. I have been using this service for the past seven years, and never before have I encountered a situation like this. My account is showing as blocked due to security reasons, despite the fact that I have not done anything wrong, and the same issue is affecting my wife's account as well. Raising a support ticket has proven completely futile.
58	Kanhaiya Prajapati	It is a good app to use for payments in shops, medical stores, mobile recharges etc. But small request - if you could please add the full history of payment transactions then it will be good. I just want to add that please add full transaction details in the full history section. It will satisfy me that my payments have completed and that money transferred to the person with no problem.
59	Prateek Karajgikar	Constant failure with transactions over Rs.1,000 has prompted me to move over to another UPI app. Some PhonePe Protect nonsense and the customer service is frustratingly impossible to reach. I would give 0 stars if I could.
60	Vinay Kumar	The autopay options have not been working for 2 months, and they are not bothered to even call back and resolve the issue. Even if we try to reach them, there is no option to contact them.
61	Swapnil Srivastav	This app is truly amazing because it allows us to order almost anything from the comfort of our homes. It is the best choice in today's time, and that is why so many people prefer using it. I have personally informed 1,736 people about this app and helped them download it. Everyone I know uses it now and loves it.
62	Abhi	It is the worst app ever. I used almost all the apps since long like MobiKwik, Cred, GPay, Bhim, Payzapp. Any offers in these apps are actually working out, but in PhonePe they are just showing offers but no cashback. If you raise it, their customer care people call you every hour and want to know the entire scenario. Every time a new person and at last nothing will happen.
63	Manjula Ramakrishna	Very good service and very easy way to pay all the payments. Thanks for PhonePe. It reminds me in time to pay my bills and other things. Thanks for everything. Good I have my PhonePe for easy way to pay my dues.
64	Mattu Lakhwinder	My experience with PhonePe is so pathetic. I usually do my vehicle insurance from PhonePe. I got my car insured 4 days ago. The address in the policy is wrong and PhonePe support team advised me to send an email to the insurer and CC them. I forwarded all the documents advised by PhonePe. I got no response from the insurer or PhonePe. It has been more than 4 days.
65	Chaithanya Kumar	Worst experience with the recent updates. Whenever the app is opened, it still shows the last transaction successful message on the screen, and I need to click Done and go back every time to make a new payment.
66	Yogesh Kumar	Coming up with the worst scheme for customers like daily gold purchase. When you purchase it is a different rate and when you sell it is a very less amount - approximately Rs.11000 less per 10 gram. Worst scheme for a customer but good for PhonePe. They are earning good money. Also no customer support available.
67	Sourav Ghosh	Do not use the app. It cuts your money without information. Even the customer care support is very bad - they never answer the call. Please I recommend do not use this app. Even if you off the autopay, still it cuts the price. They did not even inform you. Please save your money and save every transaction for PhonePe. Please do not use it.
68	ABU ZOHAIB	Very good and fast app for transactions but I am facing trouble in checking my payment history because there is no major difference in credit or debit. There should be some colors - when Rs.200 is debited it shows the history with a red mark and when credited it shows with green so that we can easily calculate the money.
69	Bhargav Borkhatariya	From the past 2 to 3 days my UPI Lite is not working. Already have the up to date version. It is showing an error - Something went wrong. Please try again later. Due to some technical issue, we could not load your UPI Lite account details. Please try again. Please fix it ASAP.

	Reviewer	Review
70	Alisha Singh	I am not satisfied with the support provided. It is very difficult to reach a real person. Trying since last 15 days - no support, no answer, no call connection. Unable to add my bank account. Auto SMS is not working. SMS verification failed while using a new device. Sometimes payment is deducted from account but does not show on screen. There is no customer care contact number visible.
71	Saurabh Agrawal	I am experiencing a significant and concerning level of battery drain from this application. Even with background activity restricted, it consistently consumes approximately 12% of the device's power. This level of consumption is not sustainable for daily use and indicates a potential optimization issue. I would appreciate it if the development team could investigate this matter.
72	Siju Moan Jose Prakash	Do not try to add money from PhonePe to the IRCTC rail web account. The money was debited from my account but not shown in my wallet. PhonePe is a fraud - they took my money. I tried to report the issue but they told me to give a complaint in cyber crime. I am very disappointed with this PhonePe app.
73	Anshu Kumari	I am writing to report an issue with my account balance and unauthorized deductions. Although I should have funds available, my account balance is currently displaying as zero. Additionally, money is being deducted automatically even though I have disabled all autopay settings. Could you please investigate these transactions and clarify why these deductions are occurring?
74	Keerthi Reddy	Extremely stressful experience. A large amount is stuck in processing for several days. No proper updates, no proper timeline, and poor support response. A payment app must ensure reliability when handling large amounts. Users should not have to worry whether their money is safe. Very disappointed. This situation creates panic when hard-earned money is involved.
75	Pritesh Tirlotkar	Dear PhonePe. Please be a payment app for people. Do not be greedy and keep increasing your platform fees. Great app but if service that has an alternative is charged more on your platform then people will start looking for alternative platforms. Contact is pathetic. Remove AI bot and place real people that can be reached.
76	Rajan Narasimhachari	I am quite happy with PhonePe. One issue I am facing is that when we make a payment by using a new phone number not in the phone book, or by scanning the QR code, the party's phone number is not available when I scroll the history. We sometimes have to talk to the recipient for many reasons. Kindly include the payee's phone number in history.
77	Nitish Kumar	Suggestion - The password requested when opening the app is currently the same as the mobile screen lock. This should be modified so the app has its own unique lock to make it more secure. Thank you.
78	Moses Immanuel (Kiran)	I do not have a car or bike. Please stop sending me notifications that my car insurance is expired. This is ridiculous. Please give me a car and pay the premium yourself. This app is collecting irrelevant data.
79	Fauzia Firdaus	Showing ads where it should not be. Often vendors ask to show the completed transaction on the screen. It was fine until PhonePe started showing ads on that screen. It is a breach of privacy as ads are based on personal preferences.
80	Gopabandhu Barik	PhonePe is a very good app. It helps in sending money to any account to which I have to send it. I like this app very much for its usefulness. It is purely a safe and sound system. I like this app very much and I shall be a regular user of this app.
81	Durgesh Tiwari	PhonePe is excellent with a user-friendly interface and fast payments. The only drawback is platform charges on recharges and bill payments, so it is better to recharge via your SIM operator's official app to avoid extra charges.
82	Lata Sahu	I am very disappointed with the customer support service on this app. It is very difficult to get any assistance when facing a problem. There is no proper response from the support team. Customer support is a very important part of any service. Kindly improve the support system so that users can get timely help when needed.
83	Vijay Sarkar	It is very easy to pay but sometimes it takes too long to succeed. If you have a speaker in the shop, payment received is announced, but in the app it is still taking time to clear. I will rate properly after this issue is fixed.
84	Shivam verma	PhonePe refer and earn service is totally worst. After you refer someone they do not provide cashback and when you complain on this issue they give a common answer that the person directly downloaded through Play Store. I have faced this issue several times so I recommend to you all - do not refer to anyone.
85	Rajanikanta Das	After the latest update PhonePe version 26.02.27.0 is crashing on my Samsung A53 mobile which has Android 16 with Feb 2026 security update. I have cleared cache and data, signed off and back on, reinstalled. It crashes after I open with error: This version has a bug, Ask developer to fix it.
86	nag t	Nowadays PhonePe has become worse than a cyber scammer. They infiltrate and read every personal SMS you receive, and show loan EMI details even though you did not give permission. They also highlight in small font that the information was found via SMS. Then where is the privacy of this UPI app?
87	Mr KIRAN	In this app in history, amount is crediting but amount is not showing in our account. I have been facing this problem from more than 24 hours, so please fix this ASAP. Because of this problem I am giving 3 star. Otherwise it is the best app and I will give 5 stars but please solve this problem.

	Reviewer	Review
88	Ashutosh Mahajan	Mismatch in my App's UPI LITE balance and Own UPI LITE Balance Tracker led me to Deregister from this App. But while Deregistering, I observed that we cannot simply Deregister from this App. This leads to inability in Receiving Payments on your Mobile Number via UPI, if Switched to a different Payment App.
89	Vijay Gaikwad	This app is not working properly. Every time I have to uninstall and reinstall the app. What is this problem? Please correct this problem immediately. I am hating this app. Now this problem is not only for me but also for many PhonePe users. Correct it as soon as possible.
90	Rajesh Soni	Respected sir, thanks for placing PhonePe wallet icon at the upper side of home screen in the app. After making this change in the application, it has become very easy to use it. Thank you again for the change.
91	Gitte Siddheshwar mohan	I have paid my SBI credit card bill and money has been debited from my account successfully. But after few minutes the payment failed automatically. And I have not received my debited money back instantly.
92	Sunny Das	Honestly, one of the best UPI apps out there - way better than GPay. I used GPay before, but constant transaction failures forced me to switch to PhonePe. The app is smooth and Gen-Z friendly. The only problem is the ads - they are annoying. Apart from that, it is solid.
93	arjun vyas	My PhonePe app takes too much time for scanning QR code and also does not show the name of the QR code owner. Because of this reason payment was cancelled many times. So I have to go with another payment app.
94	Infinity Knight	When sharing the receipt of payment via WhatsApp, the branding caption in the image is annoying. Also there seems to be no option to disable it. Initially the app experience is really great but with every new update the experience seems to be getting worse.
95	Rishabh Bishnoi	1 star. Phone Pay Protect is not letting me pay rent, or book DTDC parcel, nothing. Fix it, and I will remove 1 star. Now I am finding some alternative app as it seems like I cannot even disable this PhonePe protect bug.
96	Pramod Pattar	There should be some options to block PhonePe contacts - not known persons - for those who randomly message hi, hello and also randomly add into groups. Please add some privacy to create groups and chat blocking in PhonePe.
97	Abhinav Chauhan	So difficult to pay using wallet. I was able to use my wallet balance only after like 10 tries on Instamart, otherwise it would ask me to pay from UPI from bank account.
98	Seshadri Srinivasaiah	I keyed in my correct pin but PhonePe claimed too many wrong pins! That too to the first attempted transaction. Either your system is bad and my account is hacked. So I will stop using PhonePe from now.
99	Thirupathi Siliveri	I added payment from my credit card to my wallet. I am not able to transfer to my account. I tried to call customer care but not connecting. Worst experience with PhonePe.
100	Suryakant Surwase	Please consider adding an inbuilt expense manager in PhonePe similar to what BHIM offers. Transaction history is available, but there is no proper expense tracking, categorization, budgeting, or monthly analytics. An integrated expense dashboard would significantly improve usability and reduce dependency on third-party apps.
101	Hero Apsar	It is so easy on PhonePe that I fell in love with it. UPI on PhonePe is the best app in India. In this app we can do transactions very simply and easily. We can recharge, transfer money, take loan etc.
102	arudra vemula	Unable to verify the UPI pin despite it being correct - it shows wrong pin entered. Several failed attempts to log in. Tried reaching out through email, but to no avail.
103	Dewang Wagh Patil	I am using this UPI app for a long time, but I always get disappointed here. Automatic debited same amount and not shown in history. I am checking all services - Autopay etc. But all show no active.
104	Dinesh Kumar	Such a worst experience with PhonePe device verification - every time fail. Customer support is worst, no response more than 3 months. App still showing same problem. I could not see any ticket raise option. I tried to call customer support - not working. Shame on PhonePe.
105	Nihal T.J	I have had a very bad experience trying to reach customer support. One of my payments - which happened to be a very large amount - failed but the amount was deducted from the linked credit card. I got a message saying the amount would be reimbursed within 3 days but it has been over 6 days and the amount has not been reimbursed yet.
106	Md Dilnawaz	I am very satisfied with the services provided by PhonePe. The application is user-friendly, fast, and secure. Transactions are processed smoothly without any delay, and the interface is very easy to understand. I especially appreciate the instant payment confirmation and reliable UPI services. Customer support response is also helpful and professional.
107	Nandini YH	I have been using this app for more than 4 years. Everything was fine but when I did an emergency fund transfer it got deducted and not received by the other person, not even refunded to me. When we trusted and did payment in an emergency, how can we wait for 48 hours? Really worst experience.
108	Mohammed Ubada	There is a need to add an option in payment history - a note or a tag for ourselves so that we can remember what we paid to a particular person for. Sometimes we forget that we paid to this person, but what for? This would be very helpful.

	Reviewer	Review
109	SUKANTA M	I am going to uninstall this app because I am not getting the voice command receiver message notification option, which is only available in the business APK file. I do not want to use the business APK file. It would be great if I could get the sound alert option here. A payment announcement feature would save us from constantly checking our phones.
110	Gaurav Singh	PhonePe Wallet is one of the best - it allows easy and secure payment transfers without deducting even a single rupee. One of the most useful features is that it provides a UPI ID for the wallet. Small request: please consider providing a wallet QR code along with the wallet ID to make receiving payments even easier. Also consider linking the wallet with DBT.
111	SHUBHAM SAINI	Everything is working well, but I am facing an issue in the Money Transfers section. Under the To Mobile Number option, there are many random numbers that I used only once. Over time, the list has become very long, and there is currently no option to hide or delete these numbers. Please add a hide or delete option to improve the user experience.
112	Sumit Sahu	The app interface is simple, which makes it easy to use. There are a lot of good things about this app. But most of the time when there is a large crowd or poor network connection it fails to do the payments while alternative apps do the payments. And please add a section for notes so that we can write what the payment was for.
113	Rohit Goel	Welcome to the new way of fooling the users. I tried booking a gas cylinder. I was shown a certain amount to pay, but the final amount debited was higher by Rs.19. Nowhere in between was I shown that a convenience fee would also be deducted. This feels like cheating. Users trust is something you lost completely.
114	Gautam	Was working fine until a month ago. Nearly half of my payments get stopped by PhonePe Protect. Even legitimate bill payments, FASTag recharge, mobile and electricity bills. It has been frustrating and support does not give a response about this issue. They do not even mention why PhonePe Protect stops the payment. I am done with this app for good.
115	Shantanu Deshmukh	Suddenly I am seeing massive battery drain because of the PhonePe app. Seems this app is consuming a huge amount of battery every hour in the background. I am using Moto Edge 50 Pro running on Android 16.
116	Osman Sk	My device is showing unable to proceed due to security reasons. It works on another device. Please remove the device restriction.
117	Samir Ranjan Maikap	One more update - this UPI is not working in other countries. Please allow and enable international Indian currency transfer because most people use PhonePe. GPay works in all countries.
118	Karan Sonule	Please close the auto payment setting in PhonePe app. I am losing my money. This setting is very dangerous. I was confused and purchased Free Fire premium membership once. Now automatic next month membership purchase happens. I am counting months - total 16 months complete. So I am very tired and angry. Rs.2560 money lost from my account.
119	Tanpure Krushna	Excellent design, easy to operate. Anyone can learn easily to use. Never faced an issue.
120	Gunjan banerjee	Easy to use and fast payment, but now in phone recharge extra charges are cut. Worst app.
121	SUNIL TUPSHENDRE	This app is very fast and easy. UPI payments are processed in minutes and is best for recharges and transactions.
122	SATISH PAI	Most of the time, UPI Lite does not show balance available. Otherwise the app is extremely good.
123	Anjali Tomar	It is so easy to use. Anyone can send and receive the money easily. I liked the saving money policy. Thank you PhonePe.
124	Mahesh Bartakke	When user types amount, PhonePe system should auto-display in words. Example: Enter Rs.1250.75, Output: Amount Rs.1,250.75, In Words: One Thousand Two Hundred Fifty Rupees and Seventy Five Paise Only.
125	Uma Prasad das	I could not check my balance in PhonePe due to full screen of numbers. So please check the app as early as possible. I am facing too much difficulty.
126	ramnath thale	Forcing me to take the credit card of Rs.1499 plan. Even after telling 9 to 10 times that I do not require it, but still the calls are coming to me. This is not acceptable.
127	Jatinder S Ramgarhia	I am a regular user of PhonePe and really appreciate how smooth and reliable the app is for UPI payments. However, one feature that I and many others feel is missing is the ability to add a personal note or remark to a transaction after it is successful - ideally right on the Transaction Successful confirmation page, or as an editable option in the transaction details or history.
128	Kevin Koshy Varghese	Add biometric UPI for SBI PhonePe Black RuPay Select credit card. It says Not available on this payment method. It is available for all my other banks and RuPay credit cards except this one.
129	SIMRAN GARG	I have been facing an issue where if I scan a QR code, or if the payment is opening from a different app, and then it needs to be done from PhonePe, there is an acknowledge pop-up that comes up before the pin screen, and it is not clickable and payment cannot be done. There is no way to talk to a human agent for PhonePe.
130	DANIEL FRANCIS	It is a fraud app. Please do not use it. They allow Autopay then make it disabled so that your account gets deducted continuously so that you cannot control it.

	Reviewer	Review
131	Kumar Kamble	It is getting worse - lags too much, wasted many vouchers because of it. Randomly QR scanner opens up while using other apps.
132	Brij Bihari Gupta	This app offers a range of services like bill payment and recharge options. I feel very comfortable due to its reliability, security and when transactions are swift. Usually this is what happens but sometimes the transaction takes time to process which is very inconvenient.
133	Sagarnil Bhaumik	The question mark icon does not even give me an option to raise a new ticket and neither does it allow me to share the screenshot of the error. This is utter nonsense.
134	Ravi	Your company is losing the trust of the public by doing unethical practices. I recharged another number because you cannot show the mobile number in big font and show another number when I am trying to recharge my own number.
135	SAMIRAN DAS	Last week I faced a major problem while paying my electric bill through PhonePe UPI. Payment was hung up for almost 3 days. As a result I lost the discount I was supposed to get. Instead I had to pay a fine of nearly Rs.200 for this delay. Although I got false assurance from your end that I need not have to pay the late fine.
136	Anjineyulu T	When a sender tries to make a payment and enters incorrect credentials, the sender receives a failed message with a proper error message. However, the receiver only gets a failed message without any error details. My suggestion is that the receiver should also receive the same error message that the sender receives.
137	Chandrasena Reddy	Why did you give the option for metro booking that does not work properly? Always lags while booking ticket and does not show the payment page immediately. I always face the same issue with PhonePe.
138	Gayatri Nerlekar	I have been using PhonePe for quite some time. Recently I had a situation where money from an unknown ID was transferred into my account. The unknown person was calling me constantly for the return. I had no way of knowing if it was spam or not. I tried to raise a ticket but there was no option for this situation.
139	Mohd Waseem	It is relatively slow. Unlocking is not smooth as the PIN option is not coming - only face recognition option initially, and that too takes much time.
140	Pranali Chandewar	I really appreciate this app, but I think it would be great if it had a separate savings feature. This would allow users, especially students, to set aside money for future use, keeping it separate from their spending money. A dedicated savings option would be a wonderful addition to the app.
141	Rehana Begum	I am not able to transfer amount more than Rs.1000. Do not know why. I tried to remove that restriction but it is not possible. Feeling much difficulty.
142	sunil yadav	I sent a request to deactivate my account but you do not deactivate my account. You provide support - but why? When I want to deactivate my account on your app there is no option.
143	Mohd ilm Rahman	PhonePe is hackers new platform where you cannot delete or stop your Autopay which you never subscribed, and after lots of tickets, complaints are solved automatically without resolution. Beware of this platform. SCAMMER.
144	Sumanth Divvela	I am not receiving OTP while trying to register for the first time with my US international number. Seems I cannot reply to the response I received from customer service. The worst part is nothing to contact when I go to the help symbol. Even I tried calling those two numbers, but it says to click on the question mark symbol and call gets disconnected.
145	Krishnendu Banerjee	UPI payment was introduced to make swift payments. But often transactions remain pending for several days and fail on certain banks. Also there is no option to transfer to a different bank account from the PhonePe wallet. No customer care phone number available. In case of emergency you have to still depend on chat response which takes up to 48 hours.
146	Vignesh Ramalingam	BEWARE - CANNOT GET GOLD DELIVERED. Never ever buy Digital Gold in PhonePe, you cannot get it delivered. I bought 10gm Gold in PhonePe. They will make all your delivery requests fail pointing to technical reasons. Their support is the worst I have ever seen. I was facing this issue for more than 3 months with the worst support.
147	Sumanta Manna	The app is not being opened. Tried several times but it shows technical issue. Fed up. Uninstalled.
148	Mahadev korvan	I have been trying for many months to activate AutoPay on PhonePe. However, the PhonePe team keeps telling me that the problem is from my bank side. After speaking with my bank, I was informed that they have no role in online UPI AutoPay issues. Even after trying multiple times, AutoPay is still not getting activated. This small issue has caused me a lot of frustration and disappointment.
149	RAJESH GAIKWAD	Good. Should be updated with current demands and more features using AI. That is it. Good morning, take care, all the best to entire PhonePe team.
150	prashant vikram singh	My device verification failed from the last 1 month. I tried many times but it was not verified. I also tried to contact customer support but no reply from the executive.
151	Sahil Sonune	Respected PhonePe Management, I am writing to express my disappointment as I have been using your app for the past year, but unfortunately I have not received a single cashback reward. Interestingly, my friend downloaded the app yesterday and received a cashback, which is quite demotivating.
152	Narasimha R	Irritating. Whoever sends money in another payment app is showing in the PhonePe app. User sent the payment to my Google Pay and this is showing in PhonePe. Why? If you will not solve it I am going to uninstall the app.

	Reviewer	Review
153	Varaprasad Kambhampati	Awesome. I use PhonePe since 2019. PhonePe is a very easy-to-use payment app with fast money transfers and secure transactions. Bill payments, recharge, and QR scanning all work smoothly. Please add APEPDCL bill desk in the bill payments section.
154	LataG Nair	After having issues for many months, today I managed to send money through PhonePe. I hope I do not have any problems henceforth.
155	Uttam N Cholera	My point is what if a customer has a different query. Why are customers forced to select options designed by your team who has limited knowledge? Why cannot customers report other concerns or queries? I want to raise a concern for PhonePe HDFC Ultimo credit card and there are no options for this. I called the customer care number and there is also no option.
156	Anukamp Ramaiah	An issue I face once in a while is it says paid but recipient does not get confirmation and I get message from bank it is debited. Naturally the recipient would go by their phone not mine. It happened twice - once with Uber Auto and other with a cab driver at railway station when I was rushing to catch a train. They were frustrating experiences.
157	Rakesh Das	I am using it since launch. Now day by day its UI gets complex which is annoying for user experience. This application is known for clean and simple UI but now it is cluttered and complex. I have no option to give negative rating which it really deserves.
158	Venkatrao Kadam	I am not satisfied. Friday night I topped up wallet with credit card but it failed. Amount was debited from my credit card. Still as of now PhonePe has not refunded that amount. I am suffering. I tried to contact through your phone number but it says wrong options and disconnects. It is very bad situation. Please refund the failure amount to my bank credit card.
159	bhargavi vuyyala	Sometimes while paying money, PhonePe gets stuck in pending. Very irritating. Paytm is better in this situation - within no time it shows payment not done and you can give cash to shopkeeper.
160	AfTaB ShAbIr	One of the worst apps. I am suggesting everyone not to use this app. It always takes more time to credit the bills which we pay. Already debited from my account but not credited to the said credit card. I am worried about it. It is my hard earned money and you are also not providing customer care services.
161	Sangram dash	Recently I paid an amount at a place, but it was in processing. Because of the processing, I had to make a cash payment. When I checked the payment three hours later, I found that the payment had been processed successfully. When I talked to PhonePe customer care that my payment has been doubled they refused to give any solution.
162	Poonam Rajput	Not getting cashback on this app - using it for last 2 years. Getting useless coupons only. Still same response. What kind of service are you providing? Worst experience. I am switching to another app.
163	Albaradi Kawsar	I have been using PhonePe for a long time and it is one of the best UPI apps in India. The app is smooth, fast, and very reliable for daily payments and money transfers. However, recently ads are appearing more frequently inside the app. I kindly request the team to reduce ads to make the experience even better.
164	Ajith Agastya	Really disappointing experience. I paid for car insurance on 4th December and before payment only they had mentioned that the refund will automatically happen if the photos cannot be uploaded within 48 hours. For certain reasons I could not upload the photos. It has been 5 days and I have raised 3 tickets regarding the same issue of refund still pending and none in the team have a proper solution.
165	IT and BANKING	Facing issues from last 1 month when I scan any QR it shows network slow but there are no network issues. Other than PhonePe app everything works fine.
166	vinod kumar	Very easy to send or receive money from the other side. But sometimes it does not work fast or send and receive the payment.
167	Sourav	How to turn OFF notification sound after a successful payment? Cannot find it anywhere in settings.
168	phanindhra kodam	Worst experience ever with PhonePe. I made a payment that went into pending, and the cab driver kept asking for money again. No proper support, no cancel option - nothing works. Tried calling customer care, they kept me waiting for 10 minutes and then disconnected the call. Such pathetic service!
169	Deepak Sharma	I just changed my review and rating from 5 stars to 1 star. The working of the app is good but if you face any technical problem then there is no support. Worst experience.
170	Mittali Mahajan	PhonePe is the best payment app I have used so far! Especially its seamless wallet which I use more like a piggybank. I really want to have a bank where I could store money but do not want to use for payment. PhonePe really solved my problem by providing such a reliable wallet which does not have that much limit and also no hidden charges for withdrawal of payment!
171	Tushar Waze	PhonePe is best in quick transactions. It supports multiple banks and does tasks such as monthly electric bill, insurance, travels, loans etc. To developer: please look for the autopay system. It is inconvenient. There are not many instructions in the app to educate people about autopay. The subscription plan I thought I canceled was not canceled, somehow my money was deducted.
172	iliyas khan	I have set a passcode to open the app, but when I click on the app icon it opens directly - no passcode required. It is a safety hazard. Please fix it.

	Reviewer	Review
173	Shankar Parit	App is crashing every time after opening it. I am facing a lot of issues right now. Expecting support from tech team.
174	Shri B16	No proper support from the team for wallet closure. Giving repeated resolution but no action even if documents are shared, still seeing it in pending status. I want to close the PhonePe account but due to this issue I am unable to do so. Even after 6 months they have a technical issue for wallet closure which is really ridiculous. No cashback offers, other apps are much better in all aspects.
175	Ihjas Ahmad	Frustrating! Use at your own risk. Worst payment app I have ever used. If a transaction fails, forget your money. Referral reward is never credited and customer support is completely useless - only silence or bot replies. Unreliable, misleading, and a total waste of time.
176	Bhaskara Sudhakara Sarma	The most disappointing experience I ever had with any payment. I regret having downloaded the app and activated my bank account. Having transferred some amount to my wallet, I was unable to make any wallet payments using the QR code. Despite completing my PAN, Aadhaar and other details, I am still asked to complete a video session. I want to permanently close the account.
177	Navnath Kale	This has honestly been one of the worst experiences with a payment app. I tried to book a gas cylinder for an urgent need, and it got stuck in processing for over a day. In urgent matters, this kind of delay is just not acceptable. If I assume the payment failed and book again, I risk double-paying. Plus, their customer support is again a nightmare.

This document contains user reviews extracted from the Google Play Store for PhonePe. Reviews are compiled for reference and analysis purposes only. April 2026.

PhonePe Terms & Privacy Dataset (Compiled Summary)

Agreement

- This document is an electronic contract under the Information Technology Act, 2000.
- By using the PhonePe application or services, the user agrees to the terms and policies.
- PhonePe may modify these terms at any time, and continued use means acceptance.
