Really disappointed this time. Delivery got delayed and the food was already cold when it arrived.
Delivery was slightly delayed but nothing too serious. Food tasted normal.
Not happy with this order. Taste was off and didn't feel hygienic.
Honestly, I wasn't expecting much but the food came surprisingly hot and fresh. Packaging was neat and nothing spilled. R
Not happy with this order. Taste was off and didn't feel hygienic.
Had a bad experience. The order was messed up and some items were missing which was frustrating.
Really disappointed this time. Delivery got delayed and the food was already cold when it arrived.
Food was decent but not worth the price in my opinion.
Honestly, I wasn't expecting much but the food came surprisingly hot and fresh. Packaging was neat and nothing spilled. R
It was okay I guess. Delivery took a bit longer than expected but the food was still fine to eat.
Experience was just average. Nothing stood out but nothing was too bad either.
Food was decent but not worth the price in my opinion.

Terms and Conditions

2. Eligibility (Advanced – Enforcement + Edge Cases)

Users must be at least 18 years old and legally capable of entering into a binding contract to use the platform. While minors may access the platform under parental or guardian supervision, the responsibility for all actions performed through such accounts lies entirely with the supervising adult. Swiggy may implement verification mechanisms such as OTP-based authentication, device tracking, and behavioral monitoring to ensure compliance with eligibility requirements. Accounts found to be created using false information, fake identities, or unauthorized credentials may be suspended or permanently terminated without prior notice. Additionally, if a user is found to be previously banned and attempts to create a new account using different credentials, the system may detect and block such activity through device fingerprinting and usage patterns.

■ 3. Platform Services (Advanced – System Architecture View)

Swiggy operates as a multi-sided technology platform that connects users, restaurants, and delivery partners through a centralized system. The platform enables users to browse listings, view menus, place orders, make payments, and track deliveries in real time using location-based services. Swiggy's backend systems manage order routing, restaurant availability, delivery partner assignment, and estimated delivery time calculations using algorithmic models. While Swiggy facilitates the transaction and logistics, it does not prepare or modify the food and does not directly control restaurant operations. The platform may also provide additional services such as scheduled deliveries, subscription programs, and promotional campaigns. Service availability may vary based on geographic location, operational constraints, and partner availability, and Swiggy reserves the right to modify or discontinue services without prior notice.

■ 4. User Account (Advanced – Security + Risk Monitoring)

Users are required to create an account using valid credentials, typically verified through mobile OTP authentication. The platform may store session data, device information, and login history to enhance security and detect suspicious activity. Users are responsible for maintaining the confidentiality of their login details and must not share OTPs or passwords with others. Any unauthorized access resulting from negligence will be considered the user's responsibility. Swiggy employs automated systems to monitor account behavior, including unusual login attempts, multiple device usage, and abnormal ordering patterns. If suspicious activity is detected, the platform may temporarily restrict access, require re-verification, or permanently disable the account. Users may also be required to update their information periodically to maintain account validity.

■ 5. Orders and Payments (Advanced – Transaction Flow + Failures)

When a user places an order, the request is processed through Swiggy's order management system, which validates payment status, restaurant availability, and delivery feasibility. Once confirmed, the order is forwarded to the restaurant for acceptance. Payment processing is handled through secure third-party gateways, supporting multiple methods such as cards, UPI, wallets, and cash on delivery. In cases of payment failure, users may experience scenarios such as amount deduction without order confirmation; such cases are typically resolved through automatic reversal within a specified timeframe. The pricing structure may dynamically change based on demand, location, surge conditions, and promotional offers. Taxes, delivery fees, packaging charges, and platform fees are calculated in real time. Any discrepancies in billing must be reported within a reasonable time frame for investigation.

■ 6. Delivery Services (Advanced – Logistics + Failure Handling)

Swiggy's delivery system assigns orders to delivery partners based on proximity, availability, and efficiency algorithms. Delivery partners operate as independent contractors and are responsible for picking up and delivering orders within the estimated time frame. Real-time tracking is enabled through GPS integration, allowing users to monitor delivery progress. Delivery timelines are influenced by multiple dynamic factors including traffic, weather, restaurant delays, and order batching. In cases where delivery cannot be completed—such as incorrect address, unreachable user, or safety concerns—the order may be marked as failed delivery. In such scenarios, refunds are generally not issued if the failure is attributed to user error. However, if the failure is due to system issues or delivery partner constraints, Swiggy may initiate refunds or re-delivery. The platform may also implement contactless delivery options, where responsibility transfers to the user once the order is marked delivered.

■ 10. Restaurant Responsibilities (Advanced – Compliance + Quality Control)

Restaurants listed on the platform are independent entities responsible for food preparation, ingredient quality, hygiene standards, and packaging accuracy. They are expected to comply with local food safety regulations, including FSSAI guidelines in India. Swiggy may perform periodic quality checks, collect user feedback, and monitor complaint rates to evaluate restaurant performance. Restaurants with consistently poor ratings, high complaint volumes, or policy violations may face penalties, temporary suspension, or permanent removal from the platform. While Swiggy facilitates visibility and logistics, it does not take direct responsibility for the preparation process; however, it may intervene in dispute resolution between users and restaurants when necessary.

■ 12. Intellectual Property (Advanced – Legal Protection Scope)

All intellectual property associated with the platform, including but not limited to trademarks, logos, user interface design, content, software code, and proprietary algorithms, is owned by or licensed to Swiggy. Unauthorized use, reproduction, distribution, or modification of any platform content is strictly prohibited and may result in legal action. Users are granted a limited, non-transferable license to access and use the platform solely for personal and non-commercial purposes. Any attempt to reverse engineer, scrape data, or exploit the platform for commercial gain without permission is considered a violation of intellectual property rights.

■ 13. Limitation of Liability (Advanced – Legal Risk Framing)

Swiggy operates as an intermediary platform and limits its liability to the extent permitted by law. It is not responsible for the quality, safety, or legality of food prepared by restaurants, nor for delays caused by external factors such as traffic or weather. Swiggy shall not be liable for indirect, incidental, or consequential damages, including health issues arising from food consumption or losses caused by third-party actions. In any case, Swiggy's liability, if established, is typically limited to the value of the order in question. Users acknowledge that they use the platform at their own risk and agree to these limitations as a condition of service usage.

■ 14. Modifications to Terms (Advanced – Update Mechanism)

Swiggy reserves the right to update, modify, or replace these terms at any time to reflect changes in business practices, legal requirements, or service offerings. Updates may be communicated through app notifications, email, or website postings. Users are responsible for reviewing the terms periodically, and continued use of the platform after changes have been implemented constitutes acceptance of the revised terms. In cases of significant changes, users may be required to explicitly accept updated terms before continuing to use the service.

■ 15. Governing Law (Advanced – Legal Jurisdiction)

These terms are governed by the laws of India, and any disputes arising from the use of the platform shall be subject to the exclusive jurisdiction of the courts located in Bengaluru, India. Users

agree to resolve disputes through the prescribed legal framework and may be required to first attempt resolution through Swiggy's internal support mechanisms before initiating formal legal proceedings. Certain disputes may also be subject to arbitration, depending on applicable agreements and legal provisions.

Terms and Conditions

2. Eligibility

Users must be at least 18 years old and legally capable of entering into a binding agreement to use the platform. While minors may access the platform under parental or guardian supervision, all actions performed through such accounts are legally attributed to the supervising adult. Swiggy uses layered verification systems including OTP authentication, device fingerprinting, IP tracking, and behavioral analysis to ensure authenticity of accounts. Accounts created using fake identities, virtual numbers, or suspicious patterns may be automatically flagged, restricted, or terminated without prior notice. Users attempting to bypass bans by creating new accounts may be identified through shared device IDs, usage patterns, or payment methods and may be blocked from accessing services, offers, or refunds. In some cases, flagged users may still access basic browsing but may be restricted from placing orders or using certain features like cash on delivery or discounts.

■ 3. Platform Services

Swiggy functions as a real-time, multi-sided orchestration platform that connects users, restaurants, and delivery partners through algorithm-driven systems. It enables menu discovery, dynamic pricing display, order placement, payment processing, and live tracking. The platform uses machine learning models to optimize restaurant rankings, delivery partner allocation, estimated delivery times, and user recommendations. It does not prepare food or directly control restaurant operations but facilitates end-to-end transaction flow. Additional services include quick commerce (instant grocery delivery), scheduled orders, group ordering, and priority delivery options. Availability of services may change dynamically based on demand, restaurant capacity, delivery partner supply, and location density. Certain features may be selectively enabled or disabled for users based on account behavior, location, or operational constraints.

■ 4. User Account

Users must register with accurate personal details and verify their identity through OTP or equivalent authentication methods. The platform continuously monitors account activity including login patterns, device usage, order frequency, cancellation behavior, and refund history to detect anomalies. Users are fully responsible for all actions performed through their account, including those resulting from unauthorized access due to negligence. Swiggy may enforce additional verification steps such as re-authentication or temporary locks if suspicious behavior is detected. Accounts may be categorized into trust levels based on behavioral scoring systems; users with low trust scores may face restrictions such as disabled cash-on-delivery, limited refunds, reduced promotional access, or slower support resolution. Persistent violations or high-risk patterns may result in permanent account suspension.

■ 5. Orders and Payments

When an order is placed, Swiggy's backend systems validate payment status, restaurant availability, item stock, and delivery feasibility before forwarding the order for acceptance. Once accepted, the restaurant begins preparation, and the order enters a non-reversible stage. Payments are processed through secure third-party gateways supporting cards, UPI, wallets, and COD where available. Pricing is dynamically calculated and may include item cost, taxes, delivery charges, packaging fees, platform fees, and surge pricing during peak demand. In cases of payment failure, such as amount deduction without order confirmation, automated reconciliation systems typically process refunds within a defined timeframe. Edge cases include delayed confirmations, partial payment failures, or duplicate charges, which may require manual review. Users are expected to verify order details before confirming, as modifications after acceptance are generally not allowed.

■ 6. Delivery Services

Delivery operations are managed through algorithmic assignment systems that allocate orders to delivery partners based on proximity, workload, and efficiency metrics. Real-time tracking is enabled through GPS, and estimated delivery times are continuously updated based on live conditions. Delivery may be affected by traffic, weather, restaurant delays, batching of multiple orders, or operational constraints. In batch delivery scenarios, one delivery partner may handle multiple orders, potentially impacting delivery time. Orders may require OTP verification or may be delivered contactlessly. If delivery fails due to incorrect address, unreachable user, or refusal to accept the order, it is classified as user-fault delivery failure and is typically not eligible for refund. However, failures due to system errors, safety concerns, or delivery partner issues may be eligible for re-delivery or compensation after review.

■ 7. Cancellation Policy

Cancellation eligibility depends on the order lifecycle stage. Before restaurant acceptance, cancellations are instant and penalty-free. After acceptance, the system evaluates preparation progress, time elapsed, and resource usage to determine whether cancellation is allowed and what charges apply. Orders that are prepared, packed, or picked up are generally non-cancellable. Cancellation after dispatch is typically blocked as logistics costs have already been incurred. Special cases such as incorrect address, non-response, or refusal at delivery are treated as user-fault cancellations and are not eligible for refunds. System-driven cancellations (e.g., restaurant issues, item unavailability, or technical failures) are usually eligible for full refunds. The platform tracks user cancellation patterns, and excessive or strategic cancellations may result in stricter rules, reduced flexibility, or account restrictions.

■ 8. Refund Policy

Refunds are processed through a combination of automated systems and manual validation. When a refund request is raised, the system evaluates delivery confirmation, GPS logs, restaurant response, order history, and user behavior patterns. Refunds may be granted for non-delivery, incorrect items, missing items, damaged packaging, or verified quality issues. Partial refunds are issued for item-specific issues, while full refunds apply to complete order failures. Subjective complaints such as taste or preference are generally not eligible unless supported by clear evidence. Users may be required to provide proof such as images or descriptions, and insufficient evidence may lead to rejection. Refunds are processed either to the original payment method or platform wallet, with wallet refunds being faster. Users with high refund frequency or inconsistent claims may be flagged, resulting in stricter validation, reduced approvals, or account restrictions.

■ 9. User Responsibilities

Users are expected to provide accurate delivery information, remain available to receive orders, and interact respectfully with delivery partners and support teams. They must not engage in fraudulent or abusive behavior, including placing fake orders, misusing offers, submitting false complaints, or creating multiple accounts for benefits. Any attempt to exploit system loopholes, such as repeated refund claims or intentional cancellations, is considered misuse. The platform monitors user behavior and assigns risk levels based on patterns such as cancellations, refunds, and complaints. High-risk users may face restrictions including disabled COD, reduced refund eligibility, limited offers, or account suspension. Users are also responsible for maintaining account security, and any activity conducted through their account is considered their responsibility.

■ 10. Restaurant Responsibilities

Restaurants are independent entities responsible for food preparation, quality, hygiene, and packaging. They must comply with applicable food safety regulations such as FSSAI standards. Swiggy monitors restaurant performance through ratings, delivery times, and complaint frequency. Restaurants with poor performance, high error rates, or hygiene violations may face penalties,

reduced visibility, temporary suspension, or removal from the platform. While Swiggy does not directly control food preparation, it may intervene in resolving disputes, issuing refunds, or enforcing compliance standards. Restaurants are also expected to maintain accurate menus, pricing, and availability to avoid order mismatches.

■ 11. Privacy Policy

Swiggy collects and processes user data including personal details, transaction history, device information, and location data to enable service delivery, personalization, and system optimization. Data is used for order processing, delivery coordination, fraud detection, recommendation systems, and marketing communication. The platform may share relevant data with restaurants, delivery partners, payment processors, and analytics providers strictly for operational purposes. Sensitive financial data is handled securely through compliant payment gateways and is not stored directly. Advanced systems analyze user behavior such as browsing patterns, order preferences, and interaction history to improve recommendations and detect fraud. Users may have options to manage communication preferences, access their data, or request deletion, subject to legal and operational constraints. Certain data may be retained for compliance, dispute resolution, and fraud prevention even after account deletion.

Had a bad experience. The order was messed up and some items were missing which was frustrating.
Delivery took way too long and by the time it arrived, everything was soggy.
Not happy with this order. Taste was off and didn't feel hygienic.
Food quality was not good at all, didn't taste fresh and packaging was messy.
Experience was just average. Nothing stood out but nothing was too bad either.
Not happy with this order. Taste was off and didn't feel hygienic.

Food was decent but not worth the price in my opinion.
Not bad, not great. The taste was average and packaging could have been better.
The food quality was really nice and the portions were decent. Delivery was quick too, which made it even better.
Everything was on point today – quick delivery, good taste, and proper packing. No complaints from my side.
Loved how neatly everything was packed. Food tasted great and felt fresh. Good job!
Everything was on point today – quick delivery, good taste, and proper packing. No complaints from my side.
Loved how neatly everything was packed. Food tasted great and felt fresh. Good job!
Not bad, not great. The taste was average and packaging could have been better.
Delivery was slightly delayed but nothing too serious. Food tasted normal.
Delivery took way too long and by the time it arrived, everything was soggy.
Not happy with this order. Taste was off and didn't feel hygienic.
The food quality was really nice and the portions were decent. Delivery was quick too, which made it even better.
Pretty smooth experience overall. The order arrived on time and the taste was actually very good. Would definitely order ag
It was okay I guess. Delivery took a bit longer than expected but the food was still fine to eat.
Really disappointed this time. Delivery got delayed and the food was already cold when it arrived.
The food quality was really nice and the portions were decent. Delivery was quick too, which made it even better.
Delivery was slightly delayed but nothing too serious. Food tasted normal.
Delivery was slightly delayed but nothing too serious. Food tasted normal.
Honestly, I wasn't expecting much but the food came surprisingly hot and fresh. Packaging was neat and nothing spilled. R

Terms and Conditions

2. Eligibility

Users must be at least 18 years old and legally capable of entering into a binding agreement to use the platform. While minors may access the platform under parental or guardian supervision, all actions performed through such accounts are legally attributed to the supervising adult. Swiggy uses layered verification systems including OTP authentication, device fingerprinting, IP tracking, and behavioral analysis to ensure authenticity of accounts. Accounts created using fake identities, virtual numbers, or suspicious patterns may be automatically flagged, restricted, or terminated without prior notice. Users attempting to bypass bans by creating new accounts may be identified through shared device IDs, usage patterns, or payment methods and may be blocked from accessing services, offers, or refunds. In some cases, flagged users may still access basic browsing but may be restricted from placing orders or using certain features like cash on delivery or discounts.

■ 3. Platform Services

Swiggy functions as a real-time, multi-sided orchestration platform that connects users, restaurants, and delivery partners through algorithm-driven systems. It enables menu discovery, dynamic pricing display, order placement, payment processing, and live tracking. The platform uses machine learning models to optimize restaurant rankings, delivery partner allocation, estimated delivery times, and user recommendations. It does not prepare food or directly control restaurant operations but facilitates end-to-end transaction flow. Additional services include quick commerce (instant grocery delivery), scheduled orders, group ordering, and priority delivery options. Availability of services may change dynamically based on demand, restaurant capacity, delivery partner supply, and location density. Certain features may be selectively enabled or disabled for users based on account behavior, location, or operational constraints.

■ 4. User Account

Users must register with accurate personal details and verify their identity through OTP or equivalent authentication methods. The platform continuously monitors account activity including login patterns, device usage, order frequency, cancellation behavior, and refund history to detect anomalies. Users are fully responsible for all actions performed through their account, including those resulting from unauthorized access due to negligence. Swiggy may enforce additional verification steps such as re-authentication or temporary locks if suspicious behavior is detected. Accounts may be categorized into trust levels based on behavioral scoring systems; users with low trust scores may face restrictions such as disabled cash-on-delivery, limited refunds, reduced promotional access, or slower support resolution. Persistent violations or high-risk patterns may result in permanent account suspension.

■ 5. Orders and Payments

When an order is placed, Swiggy's backend systems validate payment status, restaurant availability, item stock, and delivery feasibility before forwarding the order for acceptance. Once accepted, the restaurant begins preparation, and the order enters a non-reversible stage. Payments are processed through secure third-party gateways supporting cards, UPI, wallets, and COD where available. Pricing is dynamically calculated and may include item cost, taxes, delivery charges, packaging fees, platform fees, and surge pricing during peak demand. In cases of payment failure, such as amount deduction without order confirmation, automated reconciliation systems typically process refunds within a defined timeframe. Edge cases include delayed confirmations, partial payment failures, or duplicate charges, which may require manual review. Users are expected to verify order details before confirming, as modifications after acceptance are generally not allowed.

■ 6. Delivery Services

Delivery operations are managed through algorithmic assignment systems that allocate orders to delivery partners based on proximity, workload, and efficiency metrics. Real-time tracking is enabled through GPS, and estimated delivery times are continuously updated based on live conditions. Delivery may be affected by traffic, weather, restaurant delays, batching of multiple orders, or operational constraints. In batch delivery scenarios, one delivery partner may handle multiple orders, potentially impacting delivery time. Orders may require OTP verification or may be delivered contactlessly. If delivery fails due to incorrect address, unreachable user, or refusal to accept the order, it is classified as user-fault delivery failure and is typically not eligible for refund. However, failures due to system errors, safety concerns, or delivery partner issues may be eligible for re-delivery or compensation after review.

■ 7. Cancellation Policy

Cancellation eligibility depends on the order lifecycle stage. Before restaurant acceptance, cancellations are instant and penalty-free. After acceptance, the system evaluates preparation progress, time elapsed, and resource usage to determine whether cancellation is allowed and what charges apply. Orders that are prepared, packed, or picked up are generally non-cancellable. Cancellation after dispatch is typically blocked as logistics costs have already been incurred. Special cases such as incorrect address, non-response, or refusal at delivery are treated as user-fault cancellations and are not eligible for refunds. System-driven cancellations (e.g., restaurant issues, item unavailability, or technical failures) are usually eligible for full refunds. The platform tracks user cancellation patterns, and excessive or strategic cancellations may result in stricter rules, reduced flexibility, or account restrictions.

■ 8. Refund Policy

Refunds are processed through a combination of automated systems and manual validation. When a refund request is raised, the system evaluates delivery confirmation, GPS logs, restaurant response, order history, and user behavior patterns. Refunds may be granted for non-delivery, incorrect items, missing items, damaged packaging, or verified quality issues. Partial refunds are issued for item-specific issues, while full refunds apply to complete order failures. Subjective complaints such as taste or preference are generally not eligible unless supported by clear evidence. Users may be required to provide proof such as images or descriptions, and insufficient evidence may lead to rejection. Refunds are processed either to the original payment method or platform wallet, with wallet refunds being faster. Users with high refund frequency or inconsistent claims may be flagged, resulting in stricter validation, reduced approvals, or account restrictions.

■ 9. User Responsibilities

Users are expected to provide accurate delivery information, remain available to receive orders, and interact respectfully with delivery partners and support teams. They must not engage in fraudulent or abusive behavior, including placing fake orders, misusing offers, submitting false complaints, or creating multiple accounts for benefits. Any attempt to exploit system loopholes, such as repeated refund claims or intentional cancellations, is considered misuse. The platform monitors user behavior and assigns risk levels based on patterns such as cancellations, refunds, and complaints. High-risk users may face restrictions including disabled COD, reduced refund eligibility, limited offers, or account suspension. Users are also responsible for maintaining account security, and any activity conducted through their account is considered their responsibility.

■ 10. Restaurant Responsibilities

Restaurants are independent entities responsible for food preparation, quality, hygiene, and packaging. They must comply with applicable food safety regulations such as FSSAI standards. Swiggy monitors restaurant performance through ratings, delivery times, and complaint frequency. Restaurants with poor performance, high error rates, or hygiene violations may face penalties,

reduced visibility, temporary suspension, or removal from the platform. While Swiggy does not directly control food preparation, it may intervene in resolving disputes, issuing refunds, or enforcing compliance standards. Restaurants are also expected to maintain accurate menus, pricing, and availability to avoid order mismatches.

■ 11. Privacy Policy

Swiggy collects and processes user data including personal details, transaction history, device information, and location data to enable service delivery, personalization, and system optimization. Data is used for order processing, delivery coordination, fraud detection, recommendation systems, and marketing communication. The platform may share relevant data with restaurants, delivery partners, payment processors, and analytics providers strictly for operational purposes. Sensitive financial data is handled securely through compliant payment gateways and is not stored directly. Advanced systems analyze user behavior such as browsing patterns, order preferences, and interaction history to improve recommendations and detect fraud. Users may have options to manage communication preferences, access their data, or request deletion, subject to legal and operational constraints. Certain data may be retained for compliance, dispute resolution, and fraud prevention even after account deletion.

The food quality was really nice and the portions were decent. Delivery was quick too, which made it even better.
Food quality was not good at all, didn't taste fresh and packaging was messy.

Food was decent but not worth the price in my opinion.
It was okay I guess. Delivery took a bit longer than expected but the food was still fine to eat.
Had a bad experience. The order was messed up and some items were missing which was frustrating.
Had a bad experience. The order was messed up and some items were missing which was frustrating.

Delivery took way too long and by the time it arrived, everything was soggy.
Food quality was not good at all, didn't taste fresh and packaging was messy.
Loved how neatly everything was packed. Food tasted great and felt fresh. Good job!
Honestly, I wasn't expecting much but the food came surprisingly hot and fresh. Packaging was neat and nothing spilled. R
Food quality was not good at all, didn't taste fresh and packaging was messy.
